HOW TO USE THIS CATALOG

1. Check Index listings below to determine your specific needs. Use corresponding tabs to go to pages listed by type.
2. You should read all descriptions in each area to determine legalities, weight restrictions and other important application information.

GENERAL INFORMATION

HOW TO USE THIS CATALOG

Passenger car/truck application index is on pages 4-8.

Refer to the page number indicated for the Make/Model.

- Find the Year, Model, and Engine Size which is located in the first three left hand columns.
- Read across the page to find the recommended converter required.
- The "Direct Fit" column lists the Direct Fit Converter; the "Universal" lists Recommended Universal converter. Specifics, such as, Front or Rear, Right, or Main plus Pre-Cat or 2 to 1 coverage, are noted in the "Description" field.

This catalog has been developed with OEM parts information. Photos and measurements are for identification purposes ONLY. Catalog photos and illustrations are printed as a sales aid/identification ONLY. No responsibility can be assumed should some reference, photo or illustration prove to be inaccurate.

ABBREVIATIONS

A.I.R.	Air Injection Reactor
AT.	Automatic Transmission

3.3	200	7.3	444
3.4	207,208	7.4	454
3.5	214	7.5	455
3.7	225	7.7	470
3.8	229,231	8.0	488
3.9	239	8.2	500

TO CALCULATE C.I.D. / LITER ENG. DISPLACEMENT:

Cubic Inch to **Liter: 1 cubic inch = .01639 liter**
Example: **351 x .01639 = 5.8L** (5.75289)

Liter to **Cubic Inch: 1 Liter = 61.02 cubic inches**
Example: **5.8**(5.75289) **x 61.02 = 351 cubic inches**

READINESS DRIVE CYCLE TEST

After all repairs have been made, any trouble codes have been erased and the MIL has been turned off, you will need to ***perform a Readiness Drive Cycle Test*** before any emissions tests can be properly done. OBD II systems conduct self-diagnostic system tests under certain conditions or enabling criteria, as listed below.

1. Elapsed time since vehicle engine start up
2. Engine temperature
3. Throttle position
4. Engine speed
5. Vehicle speed

Most of the various systems tests, conducted by the different monitors, are only done after the engine has reached normal operating temperature.

The computer runs three types of tests:

1. **Passive Tests** -- These are the tests that monitor a system or component without affecting its operation.
2. **Active Tests** -- Where the computer has the monitor produce a test signal so that it's response can be checked against stored information.
3. **Intrusive Tests** -- Where the computer performs system checks that directly affect vehicle performance and emissions.

After a passive test is run and a failure is detected, the computer then performs an active test procedure on the system. If, after the active test, another failure is detected the computer will run an intrusive test. If after the intrusive test another failure is confirmed, the computer may not, at this time, store a trouble code and/or illuminate the MIL until after this same failure occurs after two consecutive test series are completed. Because of this characteristic, it is suggested that you perform the following I/M Readiness Drive Cycle Test TWICE to be sure that all sub-systems have been checked, flags are set and all I/M monitors are in the ready condition. It is important that these benchmarks or messages the OBD II system uses indicate that all emission monitors have been run before the vehicle is released to the consumer or goes through an I/M 240 test.

I/M READINESS DRIVE CYCLE TEST PROCEDURE

1. Vehicle should be started with the engine cold.
2. Let vehicle idle until the engine is at normal operating temperature (the engine coolant temperature sensor should read 180° F of higher). Generally 5 to 10 minutes is sufficient depending on outside ambient temperature.
3. Put vehicle in gear (with brake applied) and idle for no less than 45 seconds.
4. Accelerate to 45 MPH with no more than ¼ throttle and maintain speed for a full 10 seconds.
5. Decelerate to 35-38 MPH and maintain a steady throttle and speed for 1 minute.
6. Decelerate to 25 MPH and then operate between 25 MPH and 40 MPH for 4 minutes. DO NOT operate at more than ¾ throttle for this test segment.
7. Decelerate and idle engine for 10 seconds.
8. Accelerate gently to 55 MPH using NO MORE than ½ throttle, maintain speed for a full 10 seconds.
9. Continue driving at 40 MPH – 55 MPH, Use a steady throttle pressure and maintain speed for a full 2 minutes.
10. Return to your shop and shut the vehicle off.

IT IS RECOMMENDED THAT THE ABOVE I/M READINESS DRIVE CYCLE TEST BE CONDUCTED A SECOND TIME.

If time permits, it is in your best interest to run the cycle again after the vehicle has COOLED down. Doing this second Readiness Drive Cycle Test should insure that all problems have been repaired, Flags have been set, all monitors are in the ready condition, the MIL will remain out, and the vehicle is ready to pass an I/M 240 test.

If the MIL comes back on during Drive Cycle Test 1 or 2, then further repairs are most likely needed or you did not perform the Drive Cycle Test properly. It is better that you discover this before you return the vehicle to the customer allowing you to complete the needed repairs.

GENERAL INFORMATION

When calling the Technical Helpline, please have the following information available:

1. Vehicle year, make and model.
2. Engine size and other important information such as fuel injection, transmission type or turbo charged.
3. Vehicle curb weight and/or GVW (Gross Vehicle Weight)

FINDING A UNIVERSAL CONVERTER FOR APPLICATIONS NOT LISTED

If a universal catalyst is not listed for the application you need, you can easily identify which one to use with the following information.

Identify the catalyst type that is on the car. This can be done by finding the vehicle's emission control information label. It is located under the hood and will list tune up procedures as well as emission information.

Charts are included in the next two pages to help you decode this label and also identify model year and engine type by using your VIN number. Once you have obtained this information you can find the proper replacement for your vehicle using the universal converter specification pages in the catalog.

NOTE: Care must be taken to use the proper type converter. Attention should also be given to the engine size limits and vehicle curb weights used in this catalog.

NOTES ON VEHICLE WEIGHT

Vehicle weight can be expressed by the following terms:

CURB WEIGHT - Weight of vehicle without occupants.

GVW - Total weight of the vehicle including its fully loaded capacity.

TEST or INERTIA WEIGHT - The full weight of the vehicle when ready for use. (This weight is the maximum test weight listed in the catalog. As long as the vehicle test weight does not exceed our maximum test weight and engine size, the proper aftermarket converter can be installed.)

Vehicle weight information may be found on the vehicle's weight tag on the driver's door pillar or on the vehicle registration. GVW may also be found on vehicle weight tag.

NOTICE TO PROFESSIONAL INSTALLERS

Environmental Protection Agency (EPA) guidelines state that aftermarket converters may be installed only in the following situations:

1. The converter is missing from the vehicle.
2. A state or local inspection program has determined that the existing converter has been lead-poisoned, damaged or otherwise needs replacement.
3. The vehicle is more than five (5) years old or has more than 50,000 miles on it, and there is a legitimate need for converter replacement that has been established and documented. V ehicles 1996 and newer have an 8 year/80,000 mile warranty on maj or emissions components.

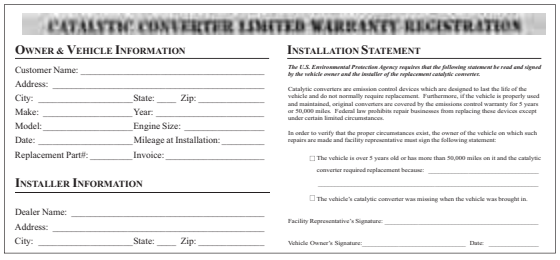
In order to establish and document that the circumstances permitting replacement of an original or missing converter with an aftermarket converter, the installer **MUST** include on the service invoice:

- The customers name and complete address
- The make, model, year and mileage of the vehicle
- The stated reason for replacement

Where a state or local government has determined that a converter is damaged or needs replacement, the service or repair facility must retain a copy of the written statement or order by a proper government representative which indicates that the converter should be replaced and attach it to the invoice.

Where the replacement need has not been verified by a proper state or local government representative, the customer and a representative of the service or repair facility must sign a statement verifying that replacement is justified. This statement, WHICH IS ON THE FIRST PAGE (installer's copy) OF THE CONVERTER WARRANTY (see pages following) shall consist of the following:

CATALYTIC CONVERTER LIMITED WARRANTY REGISTRATION



CATALYTIC CONVERTER LIMITED WARRANTY REGISTRATION

OWNER & VEHICLE INFORMATION

Customer Name: _____
Address: _____
City: _____ State: ____ Zip: _____
Make: _____ Year: _____
Model: _____ Engine Size: _____
Date: _____ Mileage at Installation: _____
Replacement Part#: _____ Invoice: _____

INSTALLER INFORMATION

Dealer Name: _____
Address: _____
City: _____ State: ____ Zip: _____

INSTALLATION STATEMENT

The U.S. Environmental Protection Agency requires that the following statement be read and signed by the vehicle owner and the installer of the replacement catalytic converter.

Catalytic converters are emission control devices which are designed to last the life of the vehicle and do not normally require replacement. Furthermore, if the vehicle is properly used and maintained, original converters are covered by the emissions control warranty for 5 years or 50,000 miles. Federal law prohibits repair businesses from replacing these devices except under certain limited circumstances.

In order to verify that the proper circumstances exist, the owner of the vehicle on which such repairs are made and facility representative must sign the following statement:

☐ The vehicle is over 5 years old or has more than 50,000 miles on it and the catalytic converter required replacement because: _____

☐ The vehicle's catalytic converter was missing when the vehicle was brought in.

Facility Representative's Signature: _____

Vehicle Owner's Signature: _____ Date: _____

Installers must retain copies of warranties, invoices and statements for six (6) months, and the replaced converters (if any) for at least 15 days from the date of installation of the replacement converter, marked in such a way that they can be identified with particular customer invoices and statements and be available for EPA inspection.

INSTALLATION REQUIREMENTS

The Environmental Protection Agency (EPA) has issued the following installation requirements. The converter must be:

1. Installed in only one of three situations:
   - The converter is missing from the vehicle.
   - A state or local inspection program has determined that the existing converter has been lead-poisoned, damaged or otherwise needs replacement.
   - The vehicle is more than five (5) years old or has more than 50,000 miles on it, and there is a legitimate need for converter replacement that has been established and documented. 1996 and newer vehicles have an 8 year/80,000 mile warranty
2. In the same location as the original converter
3. The same type of converter as the original converter (i.e. - oxidation, three-way or three way with air)
4. The proper converter for the vehicle application as determined and specified by the manufacturer
5. Connected properly to any existing air injection components on the vehicle
6. Installed with all the other required converters for the particular application if more than one converter was installed originally by the vehicle manufacturer or, in the case of new aftermarket converters, if more than one converter was specified by the converter manufacturer; AND
7. If a new converter, accompanied by the warranty information card, filled in by the installer.

Prior to installing a new converter, ensure that the engine is tuned to factory specifications and operating properly. The manufacturer assumes no liability for damage or catalytic converter failure due to installation on a improperly tuned or maintained engine.

WARNING: Catalytic Converters operate at extremely high temperatures! Allow sufficient time for the converter to cool completely before handling.

The following page contains an example of the warranty card provided with the catalytic converters sold in this catalog. **INSTALLERS** and **OWNERS** must complete the front and back of the top (White) sheet. Installers must retain the top (White) sheet. **Failure to do so is a violation of the EPA guidelines and the Clean Air Act.**

EPA ONLY - Not for sale or installation in California

GENERAL INFORMATION

WARRANTY/GENERAL INFO

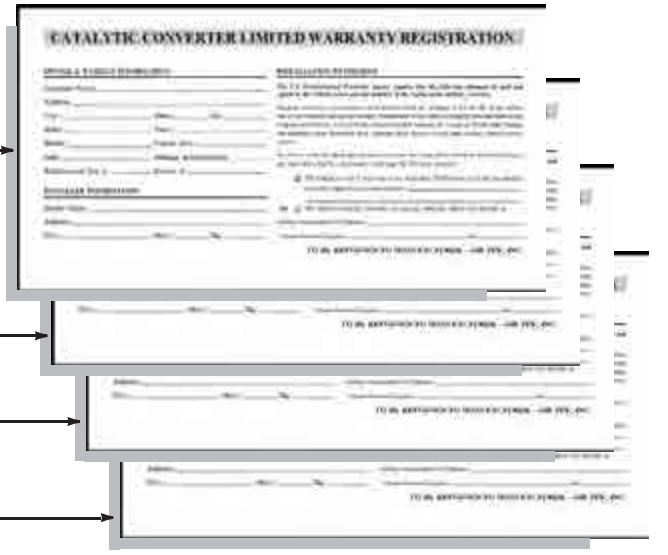
CATALYTIC CONVERTER LIMITED WARRANTY REGISTRATION

TOP SHEET:
The customer and installer MUST read and sign the installation statement. Installer retains this copy.

SECOND (YELLOW) SHEET:
This is the customer's copy. In the event that it is necessary to make a warranty claim, the customer must return the catalytic converter to an authorized dealer along with the warranty.

THIRD (PINK) SHEET:
This copy should be stuffed inside the original catalytic converter and retained for 15 days.

BOTTOM SHEET:
Mail this copy to Airtek, Inc. after affixing a postage stamp on the back side of the card.



CATALYTIC CONVERTER LIMITED WARRANTY

Airtek, Inc. makes the following limited warranty to the original retail purchaser of this catalytic converter:

1. **LIMITED WARRANTY**: This catalytic converter is warranted to be free from defects in materials and workmanship subject to the exclusion and conditions set forth below and subject to the duration limits in this paragraph. This catalytic converter has been designed and manufactured and is warranted to meet federal Environmental Protection Agency emission requirements for 25,000 miles. The stainless steel body and the nipples alone are warranted for 5 years or 50,000 miles, whichever comes first. At the conclusion of the 5 year/50,000 mile or 25,000 mile period, whichever is applicable, all liability under this limited warranty shall terminate.

2. **DEFECTS**: If the catalytic converter is determined to be defective, Airtek, Inc. will supply the purchaser with a new catalytic converter provided the following conditions are met:
   a. The purchaser must return the converter to an authorized dealer, along with the completed warranty claim card and proof of purchase.
   b. If the warranty claim relates to emission performance, the purchaser must provide proof of failure of an emission test.
   c. Airtek, Inc. may require the purchaser to provide proof that the engine was tuned to original manufacturer's specifications and maintained in proper operating condition.

THE ONLY OBLIGATION OF AIRTEK, INC. UNDER THIS WARRANTY IS TO SUPPLY THE PURCHASER WITH A NEW CATALYTIC CONVERTER.

3. **EXCLUSIONS**: Failure and/or destruction of a catalytic converter caused by the following matters are not covered by this warranty:
   a. Improper installations (including installation on a vehicle for which the converter has not been cataloged) or failure to maintain the vehicle in proper operating condition with all emission control equipment properly connected and operating according to vehicle manufacturer's specifications.
   b. The use of leaded fuel.
   c. Damage due to accident, negligence or misuse
   d. Converters installed on vehicles with modified exhaust or emission systems

ALL IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY LIMITED TO THE DURATION OF THIS LIMITED WARRANTY.

AIRTEK, INC. SHALL NOT BE LIABLE FOR DAMAGES OR INJURY TO PERSONS OR PROPERTY RESULTING FROM MISUSE OR IMPROPER INSTALLATION OF THE CATALYTIC CONVERTER.

Some states do not allow a limitation on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages. The above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

HOW TO DETERMINE ENGINE SIZE AND MODEL YEAR

IN MANY APPLICATION LISTINGS IN THE CATALOG, IT IS REQUIRED FOR YOU TO KNOW THE PROPER ENGINE SIZE.
The following information will allow you to determine proper model year and engine size:

FOR	MODEL YEAR		ENGINE TYPE
ACURA	86-99	10th DIGIT	NOT IDENTIFIED IN VIN EXC. FOR SLX
AMC	81-88	10th DIGIT	4th DIGIT
	75-80	2nd DIGIT	7th DIGIT
AUDI	81-99	10th DIGIT	NOT IDENTIFIED IN VIN
BMW	81-99	10th DIGIT	NOT IDENTIFIED IN VIN
BUICK	75-80	10th DIGIT	8th DIGIT
CADILLAC	81-99	6th DIGIT	5th DIGIT
CHEVROLET	81-99	10th DIGIT	8th DIGIT
	75-80	6th DIGIT	5th DIGIT
CHEVROLET TRUCK	81-99	10th DIGIT	8th DIGIT
	75-80	6th DIGIT	3rd DIGIT
CHRYSLER	81-99	10th DIGIT	8th DIGIT
	75-80	6th DIGIT	5th DIGIT
DAIHATSU	88-92	10th DIGIT	8th DIGIT
DODGE	81-99	10th DIGIT	8th DIGIT
	75-80	6th DIGIT	5th DIGIT
DODGE TRUCK	81-89	10th DIGIT	8th DIGIT
	75-80	6th DIGIT	5th DIGIT
EAGLE	88-98	10th DIGIT	8th DIGIT
FIAT	79-85	NOT IDENTIFIED IN VIN	NOT IDENTIFIED IN VIN
FORD (EXC.FIESTA)	81-99	10th DIGIT	8th DIGIT
	75-80	1st DIGIT	5th DIGIT

VOLKSWAGEN	81-99	10th DIGIT	NOT IDENTIFIED IN VIN
VOLVO	81-99	10th DIGIT	6th AND 7th DIGIT
	75-80	8th DIGIT	6th AND 7th DIGIT
YUGO	86-92	10th DIGIT	7th DIGIT

FOR MODEL YEAR CODES USE THIS CHART:

14 - E	06 - 6	98 - W	90 - L	82 - C
13 - D	05 - 5	97 - V	89 - K	81 - B
12 - C	04 - 4	96 - T	88 - J	80 - A or 0
11 - B	03 - 3	95 - S	87 - H	79 - 9 or M
10 - A	02 - 2	94 - R	86 - G	78 - 8 or L
09 - 9	01 - 1	93 - P	85 - F	77 - 7 or H
08 - 8	00 - Y	92 - N	84 - E	76 - 6 or E
07 - 7	99 - X	91 - M	83 - D	75 - 5

Engine codes vary greatly by manufacturer; however, in most instances you will only be asked to determine engine by letter code only.

EXAMPLE:

1985 CHEVROLET CAMARO 5.0L. 1 2 3 9 0 7 0 G A F 0 1 C A B

8th **10th**

1985 W/5.0L - G ENG.

To help determine what type of converter was originally installed on your car, look for the under hood emissions sticker which can be found on the fan shroud, filter housing, shock tower, valve cover, or on the under side of the hood. This sticker will usually contain, along with converter type information, tune up specs and engine size.

ONE OF THE FOLLOWING CODES MAY BE FOUND:

FOR: 2 WAY	OC or COC
FOR: 3 WAY	ORC or TWC
FOR: 3 WAY W/ AIR	ORC/COC or ORC/OC TWC/COC or TWC/OC

SPECIFICATIONS FOR UNIVERSAL CONVERTERS

All Converter Series comply with EPA policies. Application exceptions are noted in this catalog.

THE 602*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

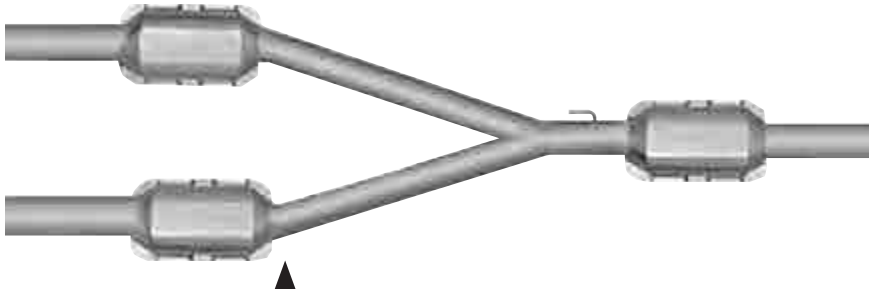
As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

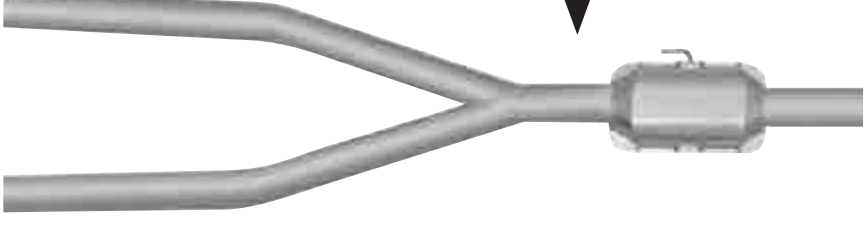
602* Series** can be used as a 2 to 1 replacement on Three-Way w/Air applications: With an Eng. displacement of 5.8L or less, and vehicle test weight of 5000 lbs or less.

This configuration can be replaced with this configuration, as cataloged

602* Series** can also be used to replace up to 2 Pre-Cats when used in Three-Way w/Air applications as the under body converter, with an Eng. displacement of 5.2L or less, and vehicle test weight of 4000 lbs or less.



This configuration can be replaced with this configuration, as cataloged



SPECIFICATIONS FOR UNIVERSAL CONVERTERS-(cont.)

All Converter Series comply with EPA policies. Application exceptions are noted in this catalog.

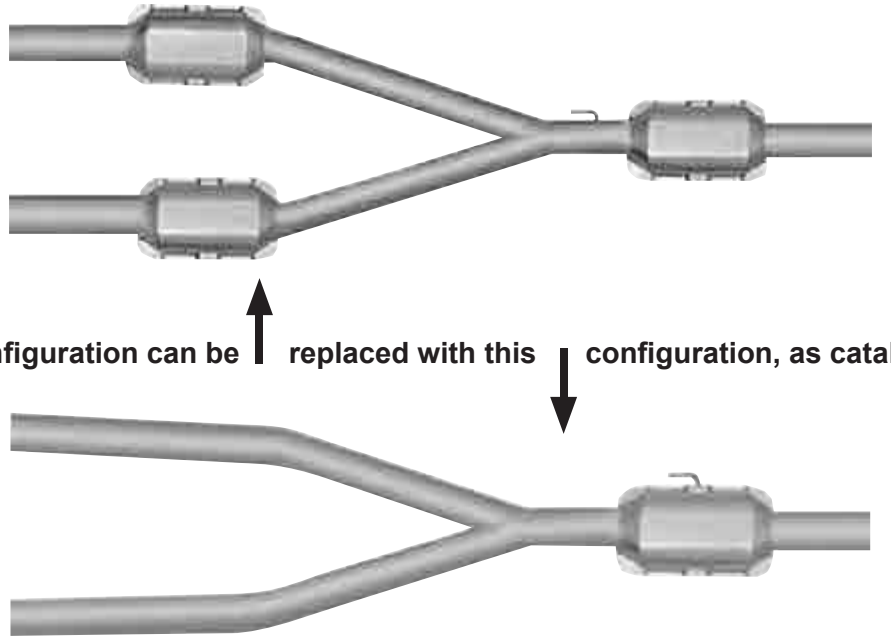
THE 603*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6000 lbs or less.

603* Series** can also be used to replace up to 2 Pre-Cats when used in Three-Way w/Air applications as the under body converter, with an Eng. displacement of 5.2L or less and vehicle test weight of 4000 lbs or less.



THE 604*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 7.7L or less, and vehicle test weight of 7000 lbs or less.

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 7000 lbs or less.

SPECIFICATIONS FOR UNIVERSAL CONVERTERS-(cont.)

All Converter Series comply with EPA policies. Application exceptions are noted in this catalog.

THE 605*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 7.7L or less, and vehicle test weight of 7000 lbs or less.

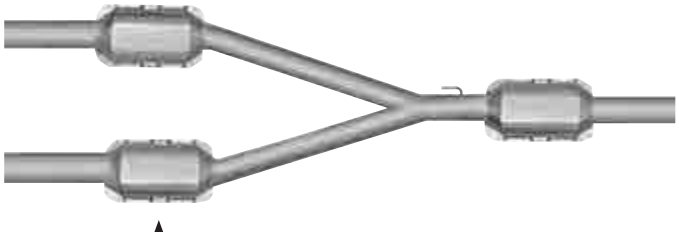
As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 7000 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 7000 lbs or less.

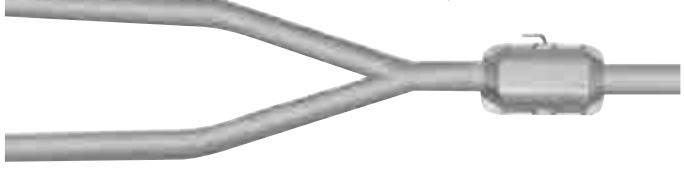
605* Series** can be used as a 2 for 1 replacement in Three-Way w/Air applications: with an Eng. displacement of 5.9L or less, and vehicle test weight of 7000 lbs.

This configuration can be replaced with this configuration, as cataloged

605* Series** converters can also be used to replace up to 2 PRE-CATS when used as the main converter, in Three-Way w/Air applications, with an Eng. displacement of 5.2L or less, and vehicle test weight of 5500 lbs or less.



This configuration can be replaced with this configuration, as cataloged



SPECIFICATIONS FOR UNIVERSAL CONVERTERS-(cont.)

All Converter Series comply with EPA policies. Application exceptions are noted in this catalog.

606*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 9000 lbs or less.

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 9000 lbs or less.

607*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 9000 lbs or less.

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less , and vehicle test weight of 9000 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 7.5L or less, and vehicle test weight of 9000 lbs or less.

608*** Series (OBD II EPA ONLY)

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6250 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 6250 lbs or less.

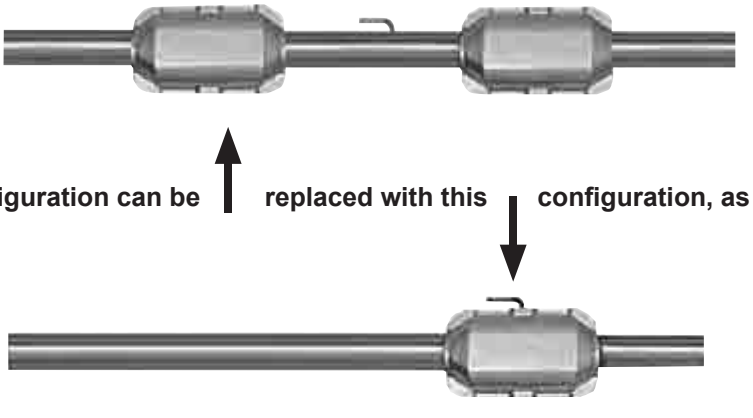
609*** Series CAN BE USED:

As a **TWO-WAY (OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 7000 lbs or less.

As a **THREE-WAY (TWC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 7000 lbs or less.

As a **THREE-WAY + OXIDATION (TWC + OC)**, Universal and Direct Fit: With an Eng. displacement of 5.9L or less, and vehicle test weight of 7000 lbs or less.

609* Series** can be used as a 2 for 1 replacement in Three-Way w/Air applications on vehicles, with an Eng. displacement of 5.9L or less, and vehicle test weight of 6515 lbs or less.



This configuration can be replaced with this configuration, as cataloged

EXHAUST TECHNOLOGIES®

FLEX COUPLING

- Complete Coverage
- Constructed with 2-Ply Bellows
- Designed with a Seamless, Convoluted Inner Core to Prevent Exhaust Leaks
- Increased Flexibility Reduces Vibrations
- Available with or without Expandable Nipple Extensions
- Available with Inner Braid

WITHOUT NIPPLE EXTENSION
