ARP automotive Racing products

The World Leader In Fastener Technology

# New Product Release

## Dodge/Cummins 5.9L/6.7L Diesel Flywheel Bolt Kit

**available for immediate delivery**

**ARP** - The world leader in fastener technology has just released a new Pro Series flywheel bolt kit for 1989 and later Dodge/Cummins 5.9L & 6.7L 12V/24V diesel applications with standard flywheels. Does not fit 2005 and later applications with dual mass flywheels.

**Part No. 147-2802** - includes a set of eight 8740 Pro Series flywheel bolts that are rated at 200,000 psi and a set of eight parallel ground chamfered washers that replace the factory Dodge bolt and washer part no# 06501680/681.

ARP flywheel bolts feature an exclusive flat 12 point head design and a larger than stock underhead radius for increased strength. Each bolt is centerless ground to ensure the bearing surface is perpendicular to the threads creating equal load distribution. Optimum design, enhanced reliability and increased strength are the main attributes of ARP's Pro Series flywheel bolts.

**ARP products are available worldwide through local distributors**
