THINKSCAN

Diagnostic and Maintenance for your car

Product Description:

ThinkScan series is a new generation of portable diagnostic products for professional and individual users. Its main functions includes not only OBD/EOBD standard diagnostics, but also professional diagnostic software and maintenance software, which can carry out comprehensive diagnosis for part of the electronic control system of vehicles.

THINKSCAN
THINKSCAN

Includes the most commonly used maintenance function to meet daily needs.

ThinkScan integrates the 10 most commonly used maintenance functions:engine oil light reset , throttle relearn, immobilizer reset, injection coding,brake pad reset, tire pressure reset, steering angle reset, ABS bleeding, battery matching, and DPF regeneration. Different models of ThinkScan series are equipped with different amounts of maintenance software.

- ABS Bleeding
- DPF Regeneration
- Throttle Adaptation
- Battery Matching
- Injection Coding
- Sunroof Initialization
- Immobilizer Matching
- Engine Oil Light Reset
- Break Pad Reset
- Tire Pressure Reset
- SAS Reset
- Gearbox Matching
- Headlights Matching
- Suspension Matching
- EGR Reset

FULL OBD II/EOBD DIAGNOSTICS

- Read Codes
- Erase Codes
- Live Data
- I/M Readiness
- O2 Sensor Test
- Vehicle Info
- MIL Fault indicator light
- EVAP System Test
- On-board mintor Test
- View Freeze Frame
- DTC Code lookup
- All OBD II Compliant vehicles

ThinkScan series includes 11 models:

ThinkScan 600, ThinkScan 601, ThinkScan 609, ThinkScan S01, ThinkScan S02, ThinkScan S03, ThinkScan S04, ThinkScan S05, and ThinkScan pro.Different models support different vehicles and functions. ThinkScan pro supports vehicle full system diagnostics and 10 special functions. Basic diagnostic functions include read/clear code and live data stream.

DTC Help

P0406

P0406 Exhauste gas recirculation (EGR for short) system is to guide little amount of exhaust to intake manifold when the engine is running under high load. The existence of exhaust reduces the temperature and pressuer of combustion chamber,thus to reduce emission of nitrogen oxide
