

Our 3M™ Hand Pad allows you to use our Hookit™ discs with the precise control that only hand sanding can offer. Featuring our Hookit™ attachment system, abrasive discs can be easily swapped without coming loose during sanding, finishing or other hands-on applications.

1 inch strap comfortably secures the pad on hand

Simple Precision at Your Fingertips

Our 3M™ Hookit™ Hand Pad helps you get that personal touch with our 3M™ Hookit™ abrasives. Designed to fit 6 inch discs, this pad features our easy to use Hookit™ hook and loop attachment system, which makes changing discs quick and easy. This soft pad helps to distribute finger pressure directly with less strain to your hands, and the high quality materials resist long term wear and tear.

The Hookit™ Advantage

3M™ Hookit™ hook-and-loop feature makes disc attachment, removal, and re-attachment easy and facilitates use and re-use of the disc for the extent of the abrasive life. Hookit™ disc pads have J-shaped hooks of the type most commonly used in everyday hook-and-loop applications. Hookit™ disc pads grip the brushed nylon loop backings of 3M™ Hookit™ discs and provide a finer finish than do adhesive backed discs. The Hookit™ system is designed for work spaces where adhesive backed discs may become contaminated by dust, dirt, or water.

Hook-and-loop feature makes disc attachment, removal, and re-attachment easy
