Step 1. Remove the trim seal from the intake housing, and remove the two bolts that secure the intake tube to the housing.

Step 2. Install the cover onto the housing by sliding it in between the housing and the intake tube.

Step 3. Reinstall the two screws into the intake tube. Make sure that the screws pass through the new intake cover and tighten them up.

Installation is now complete! Make sure to retighten all clamps and hardware after 100 miles of driving.
