Which Design Do You Have?

Ford F-250/F-350/F-450 (Single and Dual Rear Wheel) 57396 and 88396 Four-Wheel-Drive Underbracket Redesign

Background: The bottom bracket for this kit was redesigned to reduce complexity and installation time.

1st Gen Design

If the air spring's bottom plate is attached by two bolts holding a retainer plate alongside the vehicle's leaf spring mount, it is the 1st-generation design.

Part numbers

5" hex bolt: 17184

L bracket: 10886

Retainer plate: 10861

Lower bracket, with welded cup: 03990
(not shown)
