

Installation Instructions

For Part Numbers:

- | | |
|---------|--|
| 510-179 | 700-458 Airaid Oiled Media Filter |
| 511-179 | 701-458 SynthaMax Dry Media Filter - Red |
| 512-179 | 702-458 SynthaMax Dry Media Filter - Black |

2005-11 Toyota Tacoma
2007-09 Toyota FJ Cruiser
4.0L V6

INTAKE SYSTEMS FOR VEHICLES LISTED ARE 50 STATE LEGAL. SEE CARB STATUS ON EACH PART FOR A SPECIFIC VEHICLE.

Component Identification

- | | | |
|-----|--------------------------|---|
| 1. | Airaid Premium Filter | 1 |
| 2. | MAF Panel | 1 |
| 3. | Bottom Panel | 1 |
| 4. | Silicone Hump Hose | 1 |
| 5. | Left Gskt Support Frame | 1 |
| 6. | Right Gskt Support Frame | 1 |
| 7. | Weather Strip 21" | 1 |
| 8. | #64 Hose Clamp | 2 |
| 9. | 6-32x5/16" Screw | 6 |
| 10. | #6 Flat Washer | 6 |
| 11. | 6-32 Keps Nut | 6 |
| 12. | M6-1x25mm Hex Bolt | 1 |
| 13. | 1/4" Flat Washer | 1 |
| 14. | M8x1.25x16mm Hex Bolt | 2 |
| 15. | 5/16" Flat Washer | 2 |
| 16. | 3/16" Plastic Plug | 2 |
| 17. | Small Rubber Washer | 2 |
| 18. | Airaid Decal | 1 |

1. Disconnect the negative battery cable. Loosen the hose clamp on the factory intake tube where it connects to the airbox.

2. With a 12mm socket, remove two bolts that hold the intake tube to the fender.

3. Remove the complete intake tube from the vehicle.

4. Unlatch the two clips that hold the cover on the factory airbox and remove the cover and the factory air cleaner.

5. Remove the rubber gasket from around the factory air cleaner.

6. Lay the left and right gasket support frames (#5) & (#6) on a workbench (see inset) and re-install the factory rubber gasket around the outside as shown.

7. Re-install the gasket assembly back into the factory airbox as shown. Do not tamper with the factory hydrocarbon filter as this will void the vehicle manufacturer's warranty, and street legal status in the state of California.

8. Install the two rubber washers (#17) onto the two plastic plugs (#16) that are provided in the hardware kit, and insert them into the two weep holes in the factory air cleaner cover removed in step #4, as shown

9. Re-install the factory airbox cover, and re-latch both clips.

10. Assemble the Cool Air Dam panels (#2), and (#3) using the six supplied screws (#9), washers (#10), and nuts (#11). Apply the Airaid Foil Decal onto the Panel as shown.

11. Install the urethane hump hose (#4), and two #72 hose clamps (#8) on the tube of the CAD as close to the panel as possible. Leave the hose clamps loose for now.

12. Install the CAD into the vehicle by aligning the hump hose with the tube on the factory airbox, and then aligning the two holes in the bottom of the CAD with the two mounting holes on the inner fender. Install the two supplied 8mm bolts (#14) and washers (#15).

13. Install the supplied 6mm bolt (#12) and washer (#13) through the tab on the CAD and into the threaded hole in the side of the fender.

14. Center the hump hose between the tube on the factory airbox, and the tube on the CAD, adjust for fit, and tighten the hose clamps.

15. Install the Airaid Premium Filter (#1) on the CAD tube and tighten the clamp. Next install the weather strip (#7) on top of the CAD as shown. For an easier install, start at the fender side of the CAD and work your way towards the radiator.

16. Double check your work!

Make sure there is no foreign material in the intake path. Make sure all clamps, hoses, bolts, and screws are tight. Periodically check the tightness of all hose clamps. Double check the hood clearance.

17. Reconnect the negative battery cable!

Thank you for purchasing the Airaid Intake System. Your Airaid Intake System was carefully inspected and packaged. Check that no parts are missing, or were damaged during shipping. If any parts are missing, contact Airaid. The air filter element is protected from direct exposure to water and debris, care should be taken not to drive through deep water. WATER INGESTION IS THE DRIVERS RESPONSIBILITY! The air filter is reusable and should be cleaned periodically.

FILTER IDENTIFICATION

700-458 Airaid Oiled Media

702-458 Airaid SynthaMax Dry Media - Black

701-458 Airaid SynthaMax Dry Media - Red

For your Oiled media filter we suggest using the AIRAID Filter Tune-Up Kit!

SynthaMax

Do Not Oil

Synthamax Air Filters do not require oil. Service air filter as needed by cleaning with common non-petroleum all-purpose household cleaner and water. Simple Green®, Formula 409® or equivalent works great. Apply cleaner to outside of air filter and allow to soak. Then flush filter clean from the inside out with a garden hose and repeat steps if necessary. Do not apply high pressure water or air to clean filter. Allow filter to air dry and reinstall.
