

2013 Vehicle Application Listing

Every AirREX suspension kit comes with two (2) front air struts and two (2) rear air struts (or air spring + shock). Air struts are engineered to fit specific vehicles. AirREX Digital Wireless Air Management System (tanks, compressors, valves, air lines, etc.) and camber plates are sold separately.

Top plate options:

(R1) Standard top plates (comes with air struts).

(R3) Front camber plate.*

(R5) Front camber plate & rear pillowball mount.*

*Please note not all vehicles are available with camber plates. See listing below or download the application list.

Important Notices

All chassis codes and model years listed are common chassis used for suspension development. Suspension testing and vehicle fitment are conducted at AirREX headquarters in Taiwan. Please contact us if you are in doubt of USA chassis fitment or if an error is identified. Since most applications are only tested on Taiwan-spec vehicles, fitment is not guaranteed on US-spec vehicles as there may be some changes implemented by the vehicle manufacturer for sales in different regions.

Check your state and local laws regarding the use of any of these parts on public roads. AirREX parts are sold for off-road use only. Customer assumes all risk.
