

Part No. ALL26310-26316

Burst Panel Components

Burst panel is designed to blow open or release the excessive manifold pressure in the event of an internal engine explosion, helping to prevent costly supercharger and body damage. Panel meets SFI 23.1 specifications and is commonly used on supercharged, alcohol injected engines mounting directly to the intake manifold or supercharger (screw type only). Outer frame deflectors will direct force away from car.

Part No. Description

ALL26310.....Burst Panel, Large (3-1/8" x 6-1/8")

ALL26311.....Outer Burst Panel Frame

ALL26314.....Outer Burst Panel Frame w/ Deflector

ALL26313.....Inner Burst Panel Frame (Used when manifold has an open plenum without burst panel support)

ALL26315.....Fastener Kit 10-24 x 3/4", 24-Pack (For use w/ panel and outer frame or deflector.)

ALL26316.....Fastener Kit 10-24 x 1", 24-Pack (For use w/ panel, inner frame and outer frame or deflector.)
