

Part No. ALL26700-ALL26719

Transmission Coolers

Universal coolers reduce operating temperature of the fluid, extend life of the transmission and provide better performance. Use as a stand alone cooler or as an auxiliary unit to increase cooling capacity of a stock system. Increased cooling is recommended when using a high stall converter, or if the vehicle is used for towing. Choose from universal coolers with 3/8" barbed fittings, rubber hose, clamps and mounting kit, or -6AN coolers with standard -6AN male fittings and mounting kit.
