ALL42057
ALL42058

Rear End Brake Line Kit (Single Line Drop)

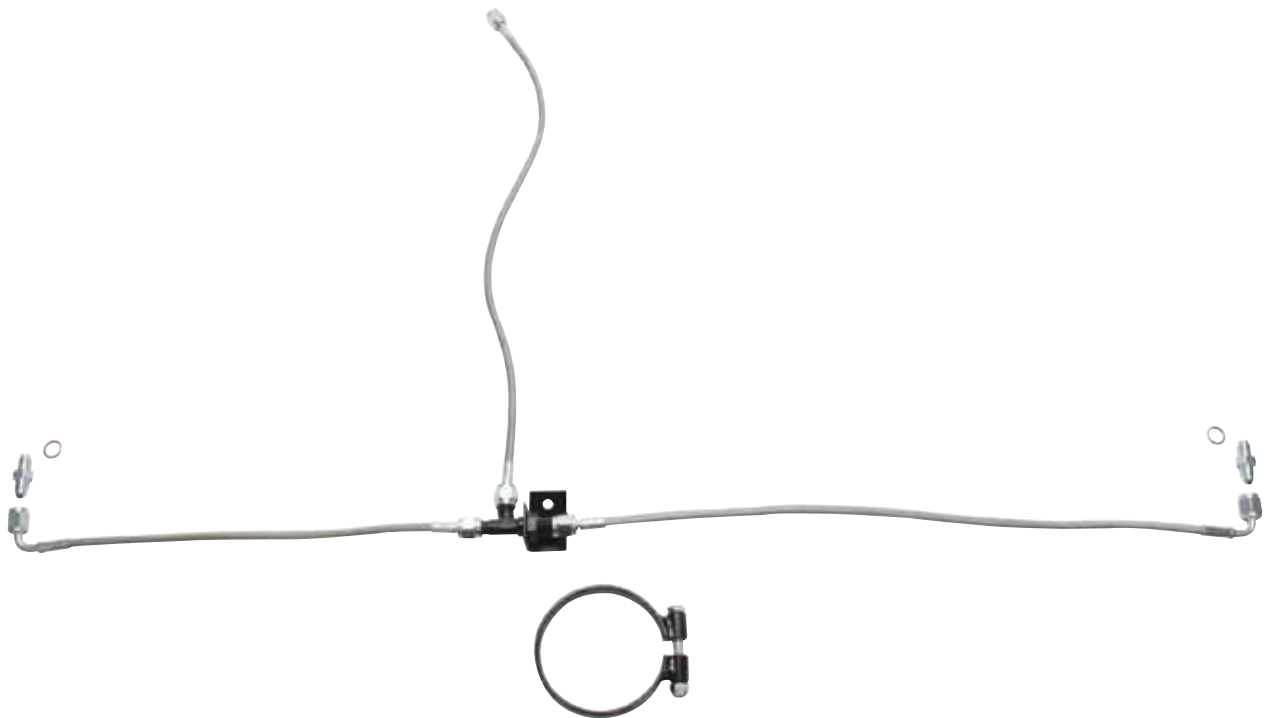

Kit is designed to eliminate 'hanging' brake lines near the rear calipers. Rear Brake Line Kits utilize a single line drop located near the left side of the center section. From the drop, the lines tee and run over the top back side of the center section, then across the backside of axle tubes to the calipers. Braided lines are #3 with -4AN ends.
