

Part No. ALL56077-56089

## "Swiveler" Spring Cups

Swiveler cup is used in place of a standard upper spring plate and weight jack bolt on vehicles using conventional style coil springs. Mono-ball stud mount allows cup to pivot as needed to prevent binding during suspension travel and requires a weight jack bolt with a 7/16"-20 internal threaded end for proper installation.

### Welded Style ALL56080

The sleeve and top are welded together on this unit to fit most applications using a 5" conventional spring.

Welded Style

### Pro-Series

Components bolt together to select the desired spring top plate and sleeve separately to build custom size cups.
