

Part No. ALL80532

Heavy Duty Bert/Brinn Starter

Heavy duty starter with a 3HP motor is designed to handle up to 16:1 compression engines.

WARNING - Due to the extreme torque this starter produces, damage may result to starter housing unless engine is turned (turning) over prior to turning ignition switch on. This is especially important on high compression engines. Attempting to start engine with ignition switch on will damage starter.

NO WARRANTY ON BROKEN HOUSINGS

REV041415
