AL'S LINER DIY TRUCK BED LINER KITS

AND ACCESSORIES

About Al's Liner

Al's Liner is the retail brand for Scorpion Protective Coatings launched in April 2008. Al's Liner is proving to be the only high solids professional grade liner in a DIY Kit. We are able to accomplish this with our simple three part batch system and specialized spray gun. Scorpion was the first to develop the easy batch mix system which allowed us to provide commercial and industrial contractors a high solids coating that did not require expensive hard to operate equipment with minimal personal protective equipment.

Scorpion was put to market in 1995 and rapidly took the place of low and high pressure pump systems not only in the commercial and industrial markets but in the truck bed lining market as well. With thousands of applicators worldwide, Al's Liner has been used in virtually every market. The simple spray gun Al's offers allows even a novice applicator to accomplish a beautiful and durable finish time and time again. Even in a saturated market, Al's Liner stands out because the common consumer cannot find a product on a store self that was equal to what they get from their local franchise installer. Recent times have shown that consumers demand more for their money, and Al's aims to deliver on this need with our Professional Grade Liner Kit and other premium Al's products.

Al's Liner Premium DIY Polyurethane Liner Kit

Al's is a polyurethane/acrylic batch system. The kit includes polyurethane resin, acrylic binder, activator, tint and primer. Also includes mixing paddle and squirt nozzle for primer. Al's can be applied at any thickness in virtually any texture or color. Simply pour components B, C, and Tint into component A and mix. You can also mix smaller amounts. We offer a customized spray gun or roller/brush kit for application. Al's offers several accessories and additives to make the prep easier and to customize the look and finish of the coating. See www.alsliner.com Resource Page for more tips on application and customization.

ITEM	PART #
AL'S LINER BLACK KIT	ALS-BL
AL'S LINER GREY KIT	ALS-GR
AL'S LINER TAN KIT	ALS-TN

EACH LINER KIT INCLUDES:

- 70 OZ Component A

- 4 OZ Primer & Sprayer
- 4 OZ Color
- 1 Mixing Paddle
- Application Instructions

Available in Black, Grey, and Tan.
Can also be custom colored with automotive pigment

*Sprayer and Mixing Paddle Not Pictured

Application/Prep Tools

Al's Liner Professional Series Air Texture Gun

Al's Liner Air Texture Gun allows users to vary the texture and thickness of Al's Liner coating effortlessly. Al's only requires a 7 CFM air compressor with 25 to 55 PSI at the gun. Many textures can be achieved by adjusting the air pressure and amount of trigger pull. Includes locking trigger control for uniform coating. For best results, it is recommended to install an air regulator for better air pressure control. Gun includes: 1.5 gallon hopper and 6, 8, and 9.5 millimeter spray nozzles.

Al's Liner Roller, Brush and Tray Set

Apply Al's Liner without having to spray it. The kit includes one two inch brush, two four inch rollers and arm and one paint tray. With the shed resistant woven rollers, you can apply up to a 15mil or 1/64th of inch coating in one pass. Excellent for tight area application, interior sound deadening application and even for truck beds.

Al's Liner Abrasive Nylon Filament Cup Brush

Our nylon filament cup brush is made of special nylon filaments infused with silicon carbide. This nylon brush lasts up to six times longer than conventional wire brushes. Nylon filament cup brush uses include frame and body cleaning, polishing, surface deburring, scrubbing and brightening, surface refinishing and decorative finishing. Safe for use on metal, wood, aluminum, and plastic surfaces. An excellent prep tool for Al's DIY Bed Liner. Fits standard 5/8" arbor.

Granular Additives

AL's Liner Black Rubber Crumb

AL's Liner Rubber Crumb is used to add non slip properties to flooring and marine applications as well as any applications that an aggressive texture is desired. It is recommended to add one half quart of Rubber Crumb to one gallon of AL's Liner for standard non-slip flooring. Great for trailers, boat decks, residential decking, etc. If an extremely aggressive texture is needed in applications such as loading ramps, mix one full quart of Rubber Crumb to one Gallon of AL's Liner. Sold in quart containers.

BLACK RUBBER CRUMB

ALS-RC

AL's Liner Vinyl Flattener

AL's Vinyl Flattener allows the applicator to achieve a semi-gloss finish as well as increase the shore hardness and viscosity of the liner. Adding one half quart of vinyl flattener to one gallon of AL's Liner will result in a semi-gloss finish with a slight texture. If you are looking for an aggressive texture similar to high pressure or polyurea bed liners, we recommend one quart of vinyl flattener to one gallon of AL's Liner. Sold in quart containers.

Miscellaneous Accessories

AL's Liner LMR (Lecithin Mold Release)

A perfect option for the AL's Liner Spray Gun for easy clean up after application but is also great for a wide variety of uses around the shop etc. Suitable for most applications where post mold parts will be painted, stenciled, glued, bonded, laminated, hot stamped or metalized. AL's LMR prevents sticking, which increases the life of dies and molds, improves product surface finishes and reduces production times. Non-Silicone, Paintable, Biodegradable, Colorless and Odorless. Sold in 12 oz. cans.
