

Lith Ease

WHITE LITHIUM LUBRICANT

DESCRIPTION: LITH-EASE is a high-quality, multi-purpose grease for automotive, marine, shop, farm, and home use. It is manufactured from the highest quality lithium soap. It is produced with "12 Hydroxy" hydrogenated castor oil, which contributes to the smooth consistency, mechanical shear stability, and wide-range temperature performance.

It is a long-lasting lubricant with excellent water resistance, corrosion protection and film strength. LITH-EASE provides superior performance in all weather and over a wide temperature range. It has excellent shelf life with minimal oil separation.

APPLICATION LITH-EASE has been developed to perform many lubrication tasks. The 14-1/2- ounce cartridge, which fits in a standard hand-operated cartridge grease gun, is well-suited for lubricating grease fittings such as those on front-end suspension, steering linkage, and repacked bearings (not wheel bearings). The one-pound aerosol with attached is ideal for lubricating hard-to-get-at places, such as the door check arm on automobile doors. Some prefer the convenience of the 8-oz. tube. Larger consumers of LITH-EASE favor the 5-pound can and 35-pound pail for economy.

Packaging

WL-35	35 Pounds
WL-14	Cartridge
WL-15	1 lb. tub
WL-19	7.5 lb can
WL-55	drum
WL-8	8 oz. plastic tube
WL-1	plastic tube
WLB-1	plastic tube
WLB-2	Stick
WL-16	Aerosol
WL-1H	plastic tube

Properties

Falex Film Strength	750# Jaw Load
Water Washout	5.00%
Oxidation Stability	1.0# Loss @ 100 hours
Maximum Lubricating Temperature	335°F
Low Temperature Lubrication	to 0°F.
Dropping Point, Minimum	360°F.
Penetration @ 77°F.	265 - 295
NLGI Grade	2
color	Very Light Cream
Corrosion Protection	1,000 Hours
(Humidity Cabinet at 100% Relative Humidity and 100°F.)
