

ANTIGRAVITY LITHIUM BATTERIES

Antigravity LITHIUM-ION Batteries offer a 70% weight reduction over lead/acid batteries while providing up to 2X the Cranking Power. Just changing to our battery in a Performance/Race Car can save up to 35 lbs instantly, or 10 lbs in a Motorcycle. Such significant weight-loss results in better starting, improved handling, shorter braking distances, better acceleration and less unsprung weight.

Additionally, our Lithium Batteries are by far the most cost-effective weight-loss product you can buy; to lose even 10 pounds of weight in Carbon Fiber is over \$10,000 dollars - comparatively for a few hundred dollars you can drop 10 - 35 pounds! Combine that with a longer service life and no toxic lead or acid, and the Antigravity Batteries Lithium-Ion Technology is a winner at every level!
