

Description: [LED Tail Light](#)
Part Number: 311052-311061-311073-311168
Application: 1994-2001 Dodge Ram

Tools needed: T27 torque screw.

Step 1: Locate the two t27 screws and remove them.

Step 2: Take off the tail light from the vehicle.

Step 3: Twist off the light bulbs from the tail light.

Step 4: Take off the bulb for the turn and brake light off the wire harness.

Step 5: Pull out the new Anzo tail light and locate the loose 1157 wedge connector. Plug this into the light bulb wire harness lining up the black wire to black and green to green.

Step 6: Twist the light bulb wire harness into the new Anzo light.

Step 7: Reinstall the tail light to the vehicle.

Step 8: Test all functions before driving.
