--------------	--------------	--------------------	--------------------------------------

	Item	Part Name	QTY	Description	Item	Part Name	QTY	Description
Parts List	1	Mesh Grille	1	Stainless steel	3	U- Nuts	8	8#
	2	Screws	8	8#				

Install Notes: Overlay Replacement Drill Cut

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Test fit the grille into the bumper opening. Installation of this bumper insert is easier if the upper grille is removed. If installing an upper grille; do not re-install the upper grille until the bumper is installed.	
3	Below the bumper is a rubber splash shield. This shield is secured with small plastic fasteners that press into holes on the frame. Use a slotted screwdriver to pull the four fasteners out closest to the bumper. This will allow access to the rear of the bumper.	
4	Attach with the eight screws and u-nuts provided in the installation kit. From the front of the billet; Insert a screw into each mounting hole. Place the billet insert over the opening. Tighten grille with screw and clips provided. Make sure the insert is centered; tighten the hardware until the grille is held firmly in place.	
5	Reinstall the black plastic cover which was removed in step 3.	
6	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result.
 Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation.
 We are not responsible for any damage caused by the installation. Thank you for choosing our product!
