Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Remove the grille from the box. Test fit the grille to make sure that it fits in the shell properly. Make sure the grille is centered.	
3	You need mark and drill one hole and thread a screw in each nut welded to the grille. From the rear, place a tab on each screw and place a two-hole tab on two screws. Now thread a nut on each screw.	
4	Repeat step 2 for the remaining hardware. Make sure the insert is centered and tighten the hardwares.	
5	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result.
Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation.
