03~07 Toyota Scion XB – Stainless Steel Mesh Grille

Hardware

2 -- 8×3/4" Truss Head Tapping Screws	2 -- #8 Flat Nuts	4 -- Washers
2 -- 6-32×1 1/2" Truss Head Screws	2 -- 6-32 Nylon Lock Nuts	4 -- Washers

NOTE: Instruction for billet grille also applies to stainless steel grille.

- (1) Remove the factory grille shell. Do not discard the fasteners.
- (2) Center the grille into the opening. It may be necessary to slightly bend the mounting brackets on the grille for an optimum fit. Use two of the factory fasteners to hold the top mounting brackets. Mark the lower mounting bracket holes to the opening. Drill a 1/8" hole at each mark. Use the #8 screws and flat nuts to secure the grille.
- (3) Close the hood and check the alignment of the grille. If necessary, remove the grille and adjust the brackets.
- (4) Installation is now complete.

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
