

**PARTS LIST:**

Item	QTY	Description	Item	QTY	Description
#01	2	Running Board(use for left or right)	#13	8	M10 Flat Washers
#02	1	Driver Front Mounting Brackets(Rear) (DFM)	#14	4	M10 Lock Washers
#03	1	Passenger Front Mounting Brackets(Rear) (PFM)	#15	4	M10 Hex Nuts
#04	2	Driver Support Brackets(Front/Rear) (DFS/DRS)	#16	12	M8X1.25-30mm Hex Bolts
#05	2	Passenger Support Brackets (Front/Rear) (PFS/PRS)	#17	16	M8 Flat Washers
#06	1	Driver Rear Mounting Brackets (DRM)	#18	8	M8 Lock Washers
#07	1	Passenger Rear Mounting Brackets (PRM)	#19	4	M8 Hex Nuts
#08	1	Driver Rear Lower Mounting Brackets (DRB)	#20	4	M8 Nylon Lock Nuts
#09	1	Passenger Lower Rear Mounting Brackets (PRB)	#21	8	M6X1-25 Hex Bolts
#10	4	M8 Nut/Bolt Plates	#22	36	M6 Flat Washers
#11	4	8mm Plastic Retainers	#23	28	M6 Nylon Lock Nuts
#12	4	M10X1.5-80mm Hex Bolts	#24	20	M6X1-20 T-Bolts

**IMPORTANT ALERT: FOR WHEEL TO WHEEL APPLICATION, WEIGHT TO THE REAR END AREA OF THE RUNNING BOARD BEHIDE THE LAST BRACKET NEED TO LESS THEN 130KG.OVERWEIGHT IN THIS AREA MAYBE DAMAGE YOUR RUNNING BOARD.**

**PROCEDURE: REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT. READ INSTRUCTIONS CAREFULLY BEFORE STARTING INSTALLATION. DRILLING MAY BE REQUIRED.**

1. Starting at the driver side-front of the vehicle, remove the sealing tape covering the factory holes in the side of the inner panel, **(Figure 1)**.
2. Determine the correct procedure to attach one driver side Bracket for your model/year:  
**Models without factory threaded inserts in body panel:**

- a. Partially thread an 8mm Hex Bolt onto the threaded end of a 8mm Bolt and Nut Plate, **(Figure 2)**. Thread the Hex Bolt in until it is flush with the welded nut, **(Figure 3)**. Use the Hex Bolt as a handle and insert the Bolt and Nut Plate into the oval hole, **(Figure 4)**. Feed the threaded bolt on the Bolt Plate through one of the hex shaped factory holes. Thread (1) 8mm Plastic Retainer onto the threaded end and down tight against the body panel, **(Figure 5)**. **NOTE:** The Plastic Retainer is designed to keep the Bolt/Nut Plate from falling into the body panel and to aid in Bracket installation.
- b. Select a driver side Mounting Bracket, **(Figure 6)**. Attach the Bracket to the threaded end of the Bolt Plate with (1) 8mm Flat Washer, (1) 8mm Lock washer and (1) 8mm Hex Nut, **(Figure 7)**. Do not tighten at this time.
- c. Remove the 8mm Hex Bolt from the nut on the Bolt Plate from **Step 3a**. Rotate the Bolt on the Bolt Plate until the threaded nut lines up with the remaining hole in the Mounting Bracket and body panel, **(Figures 7 & 8)**. Attach the Bracket to the threaded Nut Plate with (1) 8mm x 30mm Hex Bolt, (1) 8mm Lock Washer and (1) 8mm Flat Washer, **(Figure 8)**. Do not fully tighten hardware at this time.

#### Models with factory threaded inserts:

- a. Attach the driver side Bracket to the threaded inserts with (2) 8mm x 30mm Hex Bolts, (2) 8mm Lock Washers and (2) 8mm Flat Washer, **(Figures 9 & 10)**. Leave hardware loose.
3. Next, select a driver side Support Bracket. Attach the Bracket to the front facing side of the front Bracket with (1) 8mm x 30mm Hex Bolt, (2) 8mm Flat Washers and (1) 8mm Nylon Lock Nut, **(Figure 9)**. Rotate the Support Bracket to the back of the pinch weld. Line up the slots in the top of the Support Bracket with the (2) factory holes in the pinch weld. Attach the Bracket to the back of the pinch weld with (2) 6mm x 25mm Hex Bolts, (4) 6mm Flat Washers and (2) 6mm Nylon Lock Nuts, **(Figures 11)**. Do not fully tighten hardware at this time. **IMPORTANT:** 2009-10 models are not equipped with factory holes and will require drilling through the pinch weld to attach the Support Bracket. Do not drill through pinch weld at this time, **(see Step 8)**.
4. Move to the rear location, **(Figure 12)**. Select a rear upper bracket, repeat **Step 3&4** to install the rear upper Mounting Bracket and Support Bracket. Do not tighten hardware at this time. **(Figure 13)**.
5. Select the driver rear lower bracket, bolt to the upper bracket with (2)M10-80mm Hex bolts,(2)M10 lock washers,(4)M10 flat washers and (2)M10 Hex Nuts. **(Figure 14)** .Do not tighten hardware at this time.
6. Once all (2) Brackets have been installed, Select a Running Board. Slip (10)M6 T-bolts into each bottom channel**(Figure 15)**. Carefully position the Running Board onto the (2) Mounting Brackets. Attach the Running Board to the Front Mounting Brackets with (4) M6 T-bolts,(4)M6 flat washers and (4)M6 nylon lock nuts, to rear bracket with (6) M6 T-bolts,(6)M6 flat washers and (6)M6 nylon lock nuts **(Figure 16&17)**. Do not tighten hardware at this time.
7. Properly level and adjust the Running Board and fully tighten all hardware.
 

**2009-10 models requiring drilling for driver side Support Brackets:**

  - a. Make sure the Running Board is level to the vehicle. Adjust and tighten all mounting hardware.
  - b. Line up the slots on the Support Brackets with the back of the pinch weld. Mark the location of the slots onto the pinch weld.
  - c. Drill (2) 1/4" holes through the pinch weld for each Support Bracket. **IMPORTANT:** Do not drill too close to the bottom edge of the pinch weld. Adjust the Brackets as necessary to move the slots up the body panel away from the edge. Drill the holes toward the outside of the marked slots.
  - d. Attach each Support Bracket to the pinch weld with (2) 6mm Hex Bolts, (4) 6mm Flat Washers and (2) 6mm Nylon Lock Nuts, **(Figures 11)**. Check for level then fully tighten all hardware.
8. Move to the passenger side of the vehicle. Remove tape covering front, center and rear locations. Repeat **Steps 2—8** for passenger side Mounting Bracket installation. **NOTE:** Refer to the illustration on **Page 1** to identify the correct Mounting Bracket for each of the remaining locations.
9. Do periodic inspections to the installation to make sure that all hardware is secure and tight.

**To protect your investment**, wax this product after installing. Regular waxing is recommended to add a protective layer over the finish. Do not use any type of polish or wax that may contain abrasives that could damage the finish.

**For Polished Finishes:** Aluminum polish may be used to polish small scratches and scuffs on the finish. Mild soap may be used also to clean the Running Board.

For black finishes: Mild soap may be used to clean the Running Board.

### Driver Side Installation Pictured

(Fig 1) 2009-mid 2015 Driver/Left front mounting location (No factory holes in pinch weld 2009-2011 models)

(Fig 2) 8mm Bolt-8mm Nut Plate, NOTE: 8mm Bolt-Nut Plate is not required on models with threaded inserts

(Fig 3) Thread (1) 8mm Hex Bolt into the nut on the plate. Stop when bolt reaches end of nut as pictured

(Fig 4) Use the loose Hex Bolt as a handle. Insert the Bolt Plate into the oval hole and feed the threaded end out either factory hex shaped hole. IMPORTANT: Do not let go of the hex bolt until after Plastic Retainer has been threaded onto bolt (Fig 5)

(Fig 5) Thread Plastic Retainer onto Bolt Plate to hold Bole Plate in position.

(Fig 6) Driver side Bracket

Remove Hex Bolt, rotate Bolt/Nut Plate to line up threaded nut with body panel and Mounting Bracket (see arrow)

(Fig 6A) Attach Bracket to Bolt Plate

8mm Flat Washer  
 8mm Lock Washer  
 8mm Hex Nut

Front

(Fig 6B) Attach Bracket to threaded end of Bolt Plate first. Remove 8mm Hex Bolt (see Fig 3). Rotate Bolt Plate to line up with remaining factory hex shaped hole.
