

OVERVIEW

APR Performance Radiator Cooling Plates help to reduce under-hood temperatures. Formed in the autoclave at high temperatures, APR Performance Radiator Cooling Plates are made from pre-preg carbon fiber materials to be strong and light weight.

SPECIFICATIONS

Pattern

2x2 twill weave

Material

Pre-preg carbon fiber, 3K

Coating

UV-stable clear coat

Mounting

Pre-drilled mounting holes

FEATURES

Known for weight savings and durability, APR Performance <u>Radiator Cooling Plates are formed in the autoclave</u> at high temperatures using pre-preg manufacturing processes.

APR Performance Radiator Cooling Plates are molded to fit specific vehicle applications.

Mounting holes are included with every APR Performance Radiator Cooling Plate for factory-fit placement.
