

OVERVIEW

APR Performance Vortex Generators integrate with the trailing edge of the roof to reduce drag and lift-inducing turbulence. Formed in the autoclave at high temperatures, APR Performance Vortex Generators are made from pre-preg carbon fiber materials to be strong and light weight.

Vortex Generators

DOWNFORCE BALANCE

FRONT

CENTER

REAR

The Downforce Balance graph (shown at the left) illustrates which areas of the vehicle this product affects.

There are three (3) areas: Front, Center, and Rear. The size of the red bar represents how much this product affects each particular area.

BENEFITS

- ✓ Reduce turbulence-induced drag
- ✓ Reduce turbulence-induced lift
- ✓ Improve airflow to a rear wing

SPECIFICATIONS

Pattern

2x2 twill weave

Material

Pre-preg carbon fiber, 3K

Coating

UV-stable clear coat

Mounting

3M double-sided mounting tape

FEATURES

Known for weight savings and durability, APR Performance Vortex Generators are formed in the autoclave at high temperatures using pre-preg manufacturing processes.

APR Performance Vortex Generators are designed to reduce drag and lift-inducing turbulence behind the trailing edge of the roof.

Every APR Performance Vortex Generator is formed to fit the factory contour of the vehicle.
