

Description:
ARB Summit Bull Bar

Application:
Toyota 4Runner 2014+

Part No. :
3421560K- Integrit
Finish 3421550K- Satin
Finish

Product Specification

Toyota's popular 2014+ 4Runner is the latest vehicle to receive the ARB Summit bumper design.

While the 4Runner chassis mounts are carried over to the 2014+ series, the redesigned front fascia and bumper treatment on the SR5, Trail and TRD Pro models required a complete new bumper assembly to be designed and developed. ARB's engineers took this opportunity to introduce the new and innovative 'Summit Protection Series' styling .

The ARB Summit bumper features the latest styling from ARB including press form cover straps, larger ARB fog lights and surrounds, and a two piece split pan grill. To create a sleek, integrated appearance, an access door for winch clutch operation and a recessed winch control box mount were developed. This Summit bumper will be available in both ARB's textured black Integrit™ and black Satin powder coat. The proprietary Integrit™ coating offers class leading protection and unparalleled corrosion resistance while also being an ultra-low sheen, matte finish.

PROTECTION & STYLING CHARACTERISTICS

- Vehicle specific design for the Toyota 4Runner 2014+ models (SR5, Trail, TRD). - Excludes Limited Models
- Finished in the Integrit™ black, textured powder coat or the traditional Satin black powder coat.
- Registered design of styling and design components.
- Durable steel construction for maximum protection.
- Incorporates ARB's renowned multi fold upswept and tapered wing design for optimum strength and approach angle.
- 30mm radius on wings and center section.
- Engineered, air bag compatible mounting system secures to the chassis via high tensile bolts.
- Split pan design for maximum strength and airflow.
- 2 piece grill design for split pan.
- Extensive protection panels on center and either side.
- Pressed form top pan and aluminum (powder coated black) winch cover panel.
- Twin Hi-Lift jack points located beneath each buffer for optimum strength.
- Durable two piece buffers.
- Includes ARB LED Indicator and Clearance light.
- Two aerial brackets located on the top of the center tube.
- Will accommodate Warn, Magnum, Smittybilt low mount model electric winches up to 10,000lb.
- Provision to accommodate ARB Intensity LED's and IPF lights.
- Provision for optional ARB Fog light kit (Part 3500590). These fog lights are included in the 3421560K and 3421550K kit.
- Provision for optional ARB Fog light covers (Part 3500680).
- Provision for Optional Summit Roller Fairlead Cover (Part 3500850).
- Bar adds approximately 6.8 inch / 175mm to the overall length of the vehicle.
- Approximate weight of the bar, chassis mounts and fitting kit is 191 lbs / 87kg.
- Zinc rich primer for additional corrosion resistance.

ARB SUMMIT BAR COMPLETE KIT

For those customers requiring a full kit the following has been created under part number 3421560K and 3421550K. The kit includes:

- 1 x 3421560K / 3421550 - Summit bumper to suit 2014+ Toyota 4Runner
- 1 x 3500720 - Winch Installation Kit. Separate Warn ZEON fit kits may be required. Refer below winch section
- 1 x 3500590- ARB For Light Kit
- 1 x 3500530- ARB Fog Light Loom. Required due to OE fog light loom being designed for a 19W OE fog light

Kit Number	Description
3421560K	Summit Combar 4Runner Integrit 14on KIT INCL Fog & Loom
3421550K	Summit Combar 4Runner Satin 14on KIT INCL Fog & Loom

Shipping Weight: 280 lbs

DIMs: 30x80x40 (in)

Buffers, Center Pan Grill & Fog Light Surround:

The Summit Bar for the 4Runner features two piece buffers, split pan grill and ARB's Fog Light Surround (suits ARB Fog Light part number 3500590). All three components are designed to integrate with each other and the bar design.

The upright section of the two piece buffer has a style line to complement the fog light surround. The intersection of the 62.6mm press formed cover strap and buffer is covered by a covered strap intersection cap to neatly finish the pressed form cover strap.

To provide access to winch clutch handles and to assist with valuable air flow to the radiator the split pan has a two piece grill for an integrated, OE style appearance.

An access door on the left hand side allows access to winch clutch handles.

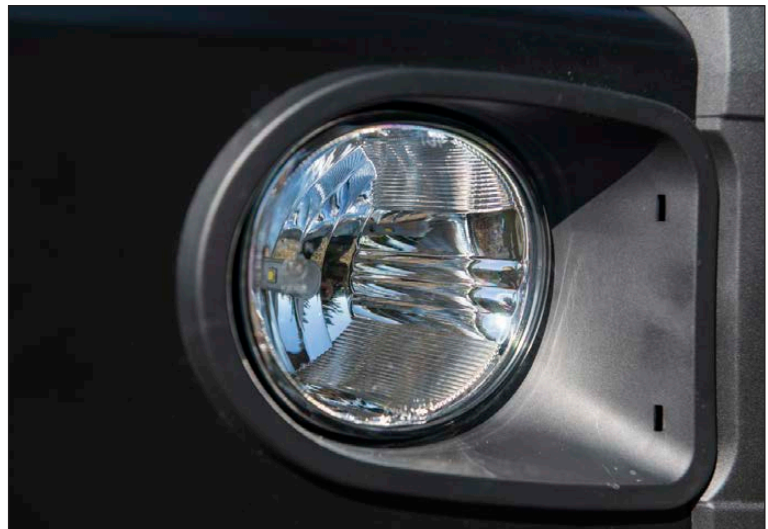

Fog Lights:

ARB's new fog light surround is featured in the ARB Summit Bar for the 4Runner.

Fitment of ARB Fog light part number 3500590 is optional. ARB Auxiliary Fog Light Loom part number 3500530 is required if fitting the ARB Fog Light Option.

The fog light surround will be supplied in a natural black finish to complement the buffer design.

A clear fog light cover has been developed separately under part number 3500680.

Pressed Top Pan and Winch Cover:

The top pan of the Summit range of bars feature a press form to add strength and a 4mm aluminum press formed winch cover panel, for when no winch is being fitted.

When fitted the winch cover panel is recessed in the press form top pan to give a level and integrated appearance.

The cover is supplied in a satin black powder coat finish.

Center and Wing Underpanels:

To provide valuable airflow to the intercooler and lower radiator, the center 2mm sheet steel stone shield features laser cut and press form apertures.

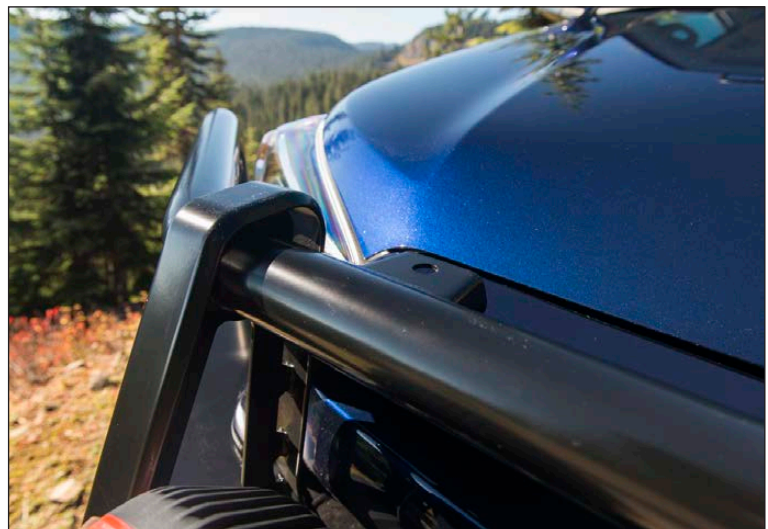

Wing panels provide protection for the low mount washer bottle.

Antenna Mounts:

Two aerial mounts are welded to the center cross tube to allow fitment of UHF/AM radio and mobile phone aerials/antennas.

Synchro pulse controlled welding is used for a visually appealing weld with seam quality that is comparable with that of a TIG weld.

Driving Light Mounts:

The press formed top pan includes laser cut holes for fitment of a range of compatible driving lights including ARB Intensity and IPF 800, 808, 900 Series lights. Pinning holes for ARB Intensity lights are included.

It is recommended that driving lights are fitted at the time of bar fitment. If driving lights are being fitted after the bar has been fitted, the center lower stone tray will need to be removed to provide access to the right hand side driving light mount.

LED Clearance Light / Turn Signals:

Press form apertures in each wing are provided to fit ARB's LED clearance light / turn signal.

Hi-Lift Jack Points:

Hi-Lift jack points are located directly below the buffers.

The Hi-Lift jack point is welded directly to the upright on either side and is designed to prevent the Hi-Lift jack from interfering with the buffer.

Integrit™ Powder Coat:

Manufactured in Australia, this proprietary polymer blend delivers incredible resistance to damage from sources such as road debris, surface abrasion, weathering, acid spotting, and off road usage. For improved corrosion resistance products available with Integrit™ are now pre-treated with a zinc rich powder coat primer before coating. Utilizing ARB's quality controlled pre-treatment process; the textured finish offers class leading protection, providing unparalleled corrosion resistance.

Integrit™ texture powder coated surfaces benefit from self-cleaning capabilities, with the formula incorporating a synthetic PTFE wax for resistance against dirt and road grime. The coating is easily cleaned with a mild wash solution.

Winch Fitment:

The Summit Bar range has an integrated control box mount that recesses the control box lower in the pan. Different mount holes and control box mount brackets are provided to suit different winches. Winch Fitting Kit instructions have further information as to which mount hole or bracket is suitable.

The ARB Summit bar fits the following winches:

- Warn M8000, XD9000, XP9.5, XDC 9.5
- Warn ZEON 8, 8-S, 10, 10-S
- Warn ZEON Platinum 10, 10-S
- Smittybilt Gen 2 X20 10K
