

Description:
IPF Xtreme LED Sport Lights

Application:
Auxillary Lighting

Part No. :
900XLSS- IPF LED Spot
900XLST- IPF LED Touring

Product Specification

IPF NOW OFFERS A LED VERSION OF THE POPULAR 900 SERIES XTREME RANGE OF LIGHTS.

The Xtreme LED Sport joins the 901XS and the 900XS HID Internal ballast to offer a wide range of IPF lights to suit any customer's needs.

Using their 70 year history in light development, IPF have developed a "Tri-wall Reflector" to achieve a level of performance usually associated with a higher number of individual LED's.

The style of reflector utilized in the 900XLS LED lights allows for better beam pattern control, reduced number of LEDs and maximum heat dissipation. The die cast aluminum housing results in a light weight (3.3lbs), high performance light with a draw of 25 watts per light.

Total light output is 1,400 lumens.

Both lights provide a color temperature of 6500 Kelvin. The Touring beam provides 0.25 lux at over 400m and the Spot beam has 0.25 lux at over 800m.

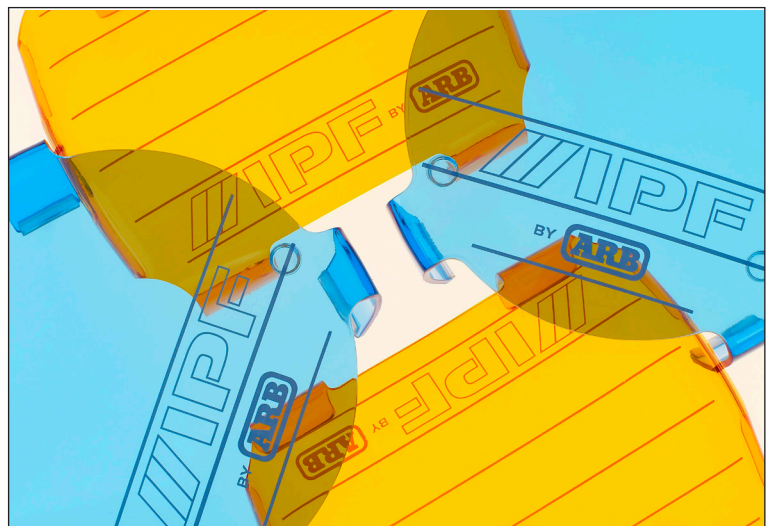

To achieve the best balance of distance and spread, IPF recommends purchasing a combination of one spot and one touring beam. For ease of ordering, ARB has developed 900LEDKIT1 containing a wiring harness, spot and touring beam lights.

Features:

- Available in either Spot or Touring Beam
- Unique designed "TRI-WALL REFLECTOR"
- 3 CREE High Power LED's
- Easy plug in, internally mounted high quality LED driver circuit with waterproof Deutsch DT-6 connectors
- Works with ARB Driving Light Loom part number 3500520 (sold separately).
- Tough and lightweight. Die cast aluminum body with magnified heat sink
- High transparency, hard coated, reinforced polycarbonate lens for superior durability, resistance to breakage and heat shock
- Reinforced multi directional mounting base with stainless steel cup, die cast alloy pedestal and M12 heavy duty stem
- Advanced heat proof resin reflector, incorporating a water and dust resistant membrane breather
- Existing 900XS clear covers fit (sold separately)
- Suits Driving Light locknut part number DLL12 for added security (sold separately)
- Wiring harness loom (3500520) is including in the 900LEDKit1

Cover Options:

The Xtreme LED Sports light accept all current 900XS driving light covers including clear, blue, amber and the grill style

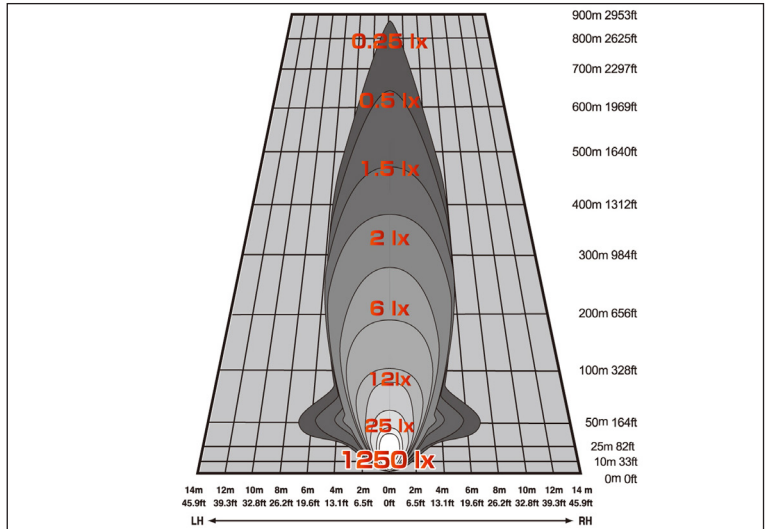

Packaging:

IPF LED lights come packaged separately as either Spot or Touring beam.

ARB Driving Light Loom P/N 3500520 is sold separately.
