

GN092-L28-AMPS

Arkon Car or Truck Seat Rail Mounting Pedestal with Gooseneck and 4 Hole AMPS Head Retail Black

DESCRIPTION:

The GN092-L28-AMPS car or truck seat rail mounting pedestal can be used as a replacement, upgrade, or as an addition to an existing pedestal. It is compatible with Arkon's Slim-Grip Universal Tablet Holder (TAB001-AMPS), as well as devices having a 4-Hole AMPS pattern, including vehicle-specific mounts (VSMs), cameras, GPS devices, audio/video receivers, or satellite radios including Sirius S50, Sirius XM Onyx Plus, XM Onyx EZ, Sirius XM Lynx, Stratus 7, Dock & Play, and Sirius Dock & Play (sold separately). This mounting pedestal is also ideal for mobile radio holders, housings, and other devices used by public safety, construction, and utility applications. Formerly an industry standard, the 4-Hole AMPS pattern consists of four holes located in a rectangular pattern spaced at 30.17mm by 38.05mm (measured as the center-to-center distance between holes). The car seat rail mount is made of strong yet flexible aluminum, and is ideal for service vehicles, trucks, or those who need easy access to their devices but prefer mounting them somewhere other than the windshield or dashboard. Use a socket wrench to install the mount to the car's seat rail. Loosen the passenger seat track bolt, insert the included seat track bolt bracket (2 different brackets are included for various seat rail configurations), and then retighten the bolt. The seat bolt bracket openings measure 12mm wide and 30mm long. Bend the 28" gooseneck and rotate the swivel ball adapter head for 360-degree rotation for exact positioning of the device.

FEATURES:

- Strong yet flexible aluminum mount recommended for service vehicles and trucks
- Compatible with GPS, cameras, and other devices having a 4 Hole AMPS pattern
- 28 inch gooseneck and swivel ball provide ideal positioning of device
- 2 year limited warranty
