

MRM2XAMPS

Arkon Robust Heavy Duty Metal AMPS Drill Base Mount Pedestal Retail Black

DESCRIPTION:

The MRM2XAMPS 4-Hole AMPS drill base mounting pedestal is part of Arkon's Robust Mount Series. It features a heavy-duty metal AMPS drill mount base as well as a metal AMPS head for extra stability in commercial vehicle use. It can be drilled into solid, flat surfaces, such as car dashboards or consoles as well as walls, tables, and workbenches. The mount is compatible with devices having a 4-Hole AMPS pattern, including cameras, GPS devices, or satellite radios. This tough mount is also ideal for mobile radio holders, housings, and other devices used by public safety, construction, and utility applications. The AMPS pattern consists of four holes located in a rectangular pattern spaced at 30.17mm x 38.05mm (measured as the center-to-center distance between holes). This package includes only the heavy-duty mounting pedestal with metal 4-Hole AMPS drill base and head. This mount measures approximately 5 inches high from end to end, and the mount shaft is made of metal. The arm of the pedestal swivels on both the top and the bottom, providing 360-degree rotation and the ultimate flexibility in positioning the device at any angle.

FEATURES:

- Compatible with devices with 4 Hole AMPS pattern, including vehicle specific mounts, cameras, GPS, and satellite radios
- Mounting pedestal base attaches to solid flat surfaces
- Metal AMPS drill base and head for extra stability
- 2 year limited warranty
