

# LIMITED WARRANTY

## ATTURO TIRE LIMITED WARRANTY

All Atturo tires have a (3) three year manufacture's defect warranty. This warranty only applies to the original purchaser of an Atturo tire and is not transferable. Eligible tires must be purchased new and must be used on the vehicle for which they were originally installed. Additionally, all tires installed must be of an equivalent or greater load index to that specified by the vehicle manufacturer. The load index is the numerical designation imprinted on the sidewall of the tire and corresponds to a specific load carrying capacity. (Marks such as "Load Range E" or "10 ply rating" are NOT a load index as they do not correspond to any specific load carrying capacity. These legacy markings may NOT be relied upon for accurate applications of load capacity.) All tires must also be mounted to a wheel within the approved rim width of the tire. Each tire has a specific rim width range on which the tire can be mounted. Failure to follow rim width recommendations may result in poor tire performance or possible wheel and/or tire failure.

### Standard Coverage

If an Atturo branded tire becomes unserviceable in the result of an eligible adjustable condition during the first 2/32" of tread wear, it will be replaced with an equivalent new Atturo tire, at no charge. When the tread is worn past the first 2/32", if the product exhibits an eligible adjustable condition, it will be replaced on a pro-rated basis. You must present proof of purchase and be the original owner when requesting a replacement for your tire. Any Atturo tire that does not deliver satisfactory service due to a confirmed balance, out of round or a ride complaint issue will be replaced without charge within the first 2/32nds of the tire's tread life. After the first 2/32nds the tire is not warrantable.

### Tread Life

The tread life/mileage warranty only applies to the original owner and the original vehicle. Proof of purchase and vehicle mileage on the original installation date are required. The consumer is also required to prove that the tires were properly inflated, periodically rotated and aligned, replacing worn suspension components as necessary. Wheel alignment and balancing are important for safety and maximum mileage from your tires. The tread life/mileage warranty does not apply to the following conditions: Tires used in commercial applications including but not limited to, police, taxi/limo/Uber/Lift or similar Ride Share transportation service, national account, government and contract sales. Tires supplied as original equipment. Tires on any vehicle other than the vehicle on which they were originally installed.

Atturo has mileage warranties for the Trail Blade X/T, Trail Blade A/T, AZ800, AZ610, and the CV400. Unfortunately, due to the variety of use, road conditions and geographic influences encountered across the country, all consumers may not receive the warranted tire mileage. To qualify this limited warranty, the consumer must complete specific maintenance requirements. Tires become legally worn out when they reach 2/32" of remaining tread depth (shown by tread wear indicators molded into the tread grooves). Atturo will consider a mileage warranty claim when one or more tires has been worn to at least 3/32". Tires that are properly maintained should wear evenly and the rate of wear should be consistent on all tires on the vehicle. Tires with uneven wear or variances of more than 2/32" between the tread depths of the outer, center and inside grooves will not be eligible for warranty consideration. The consumer will receive a pro-rated credit toward the purchase of a replacement Atturo tire, based on mileage not achieved by the warranted tire. Atturo warrants tread life for up to 5 years from the date of purchase.

The following Atturo tires feature these mileage warranties:

- AZ610 - 60,000 miles
- AZ800 - 40,000 miles
- CV400 - 40,000 miles
- Trail Blade A/T - 50,000 miles
- Trail Blade X/T - 45,000 miles

Certain Atturo tires, such as the Trail Blade BOSS, Trail Blade M/T, AZ850 and the AW730 ICE are not covered by a mileage warranty. Atturo makes no claim or representation of how many miles/kilometers these tires will last. Tire life can vary, depending on vehicle condition, road conditions, driving habits, proper maintenance and proper inflation. Tagged fitments can be defined as different tire sizes on the front and rear axles. Due to the inability to rotate onto different axles, a 20,000 warranty applies to the rear tires only.

#### What Is Not Covered

Adjustments will not be made for tires that become unserviceable due to:

- Conditions resulting from road hazards, includes but are not limited to impact damage, cuts, snags, or punctures
- Conditions such as, but not limited to, uneven, cupping, spotty, feathering tread wear resulting from improper installation, wheel misalignment, tire/wheel assembly imbalance, use of an improper rim, improper mounting or dismounting or improper fitment
- Conditions resulting from consumer damage, such as, but not limited to, improper tire and vehicle maintenance, misuse, abuse, accident, under inflation, overloading, over deflection, failure to follow recommended rotation practices, cut by vehicle, run flat or improper fitment
- Conditions resulting from suspension modifications (Ply Steer Residual Lateral Force)
- Balance, out of round, lateral/radial pull or ride complaint issues after the first 2/32" of tread wear
- The installation of any tubes
- Tires used in any commercial, racing, or off-road applications
- Ozone or weather cracking on tires over (4) four years from date of manufacture or date of purchase. Proof of purchase is required. Without proof of purchase the manufacturer date will be used to determine eligibility
- Tires stored improperly

Tires which have been punctured, whether or not they were repaired. Failures subsequent to a repair are not covered. Worn to 2/32" (1.6mm) or more than 60 months old (based on date of purchase) whichever comes first. Proof of purchase is required. Without proof of purchase, the manufacturer date will be used to determine eligibility. Altered in any manner (additional siping, buffing, stud pin holes, re-grooving, truing, etc.). Acquired as used (tires purchased used, equipped on a pre-owned vehicle, etc.). Installed on any vehicle other than the vehicle on which they were first installed. Worn unevenly and/or show a difference of 2/32" (1.6mm) between the grooves. Tires installed on a vehicle which are lower than the original equipment specified load index by the vehicle manufacturer. Tires mounted on rims outside the published specifications of Atturo Tire. Using wheels which are outside the specified range can have a detrimental effect on the load capacity, performance and overall life of the tire. Tires installed on dual rear wheel vehicles which are not rated for dual applications. Damage during mounting or installation.
