Lower profile, wrap  
design (car/SUV)

### **AEROSKIN™**

Designed to flow with the contours of your vehicle's hood, Aeroskin creates a sleek, stylish profile, flush mounting to the hood for a skin-tight fit. This leading-edge hood protection offers the ultimate in style and durability. Aeroskin's flexible acrylic material makes this accessory wear-and-tear resistant as well as car wash safe.

### **BUGFLECTOR®**

AVS Bugflector features a more traditional hood width and a medium profile design, helping shield the hood and windshield from bugs, stones and other road debris. The shield's rugged, impact-modified acrylic material makes this accessory wear-and-tear resistant as well as car wash safe.

### **BUGFLECTOR II®**

AVS Bugflector II features an aerodynamic, wrap-around design providing hood, windshield and fender protection with a sleek, classic look. This hood shield's high profile design features a raised lip to deflect bugs and debris up and over the windshield along with an off-the-hood design allowing for easy washing and waxing.

### **HOODFLECTOR®**

AVS Hoodflector is a lower profile hood shield providing hood, windshield and fender protection from mud, sand, dust as well as rocks and other road debris. The shield's durable, impact-modified acrylic material makes this accessory wear-and-tear resistant as well as car wash safe.

### **CARFLECTOR®**

AVS Carflector hood shield, designed specifically for cars and SUVs, features all the great benefits of AVS hood shield products, protecting the hood, windshield and fender. The shield's durable, impact-modified acrylic material makes this accessory wear-and-tear resistant as well as car wash safe.
