

Installation Instructions

Ventshade® Deflector

Important Safety Information

- CAUTION - Before driving, ensure that the vent visor is properly secured to vehicle.
- Do not use automatic "brush-style" car washes.
- Do not use cleaning solvents of any kind.
- Periodically check all components for tightness.

Preparation Before Painting / Installation

- A trial fit is recommended to ensure proper positioning and fit.
- Check fit of parts before painting as we will not accept the return of modified or painted parts.
- Wash and dry your vehicle to remove any debris and/or dirt from the installation area.

Installation Steps

Step 1:

Open windows before installing deflectors.

Step 2:

Position deflector slightly below the window opening and insert the flat flange in between the division bar and steel bead of glass run. If the opening is not wide enough to insert the flange, separate it slightly with a putty knife or other sharp edged tool.

Step 3:

Insert curled flange at the opposite end, between the window frame and the glass run.

Step 4:

Slide the deflector upward until contact is made with the upper window frame. Then, starting at the corners and working toward the center, apply upward pressure to the upper curled flange until it seats between the glass run and the window frame. (Using a blunt edged instrument to pry the outer lid of the glass run away from the deflector will ease seating the deflector flange, and will prevent buckling of the glass run.

Step 5:

Using the holes in the deflector as a guide, drill 5/64" diameter holes into the window frames.

Step 6:

Install #4 x 1/4" self tapping screws, using a magnetized screw driver. NOTE: Extreme care must be taken when drilling holes. Drill must be held steady to assure proper hole size. Excessive pressure will result in broken drills.

Care and Cleaning

- Wash only with mild soap & dry with a clean cloth.

Congratulations!

You have purchased one of the many quality Auto Ventshade™ branded products offered by Lund International, Inc. We take the utmost pride in our products and want you to enjoy years of satisfaction from your investment. We have made every effort to ensure that your product is top quality in terms of fit, durability, finish and ease of installation.

When it comes to quality rain guards and wind deflectors, AVS is the brand you can depend on.
