

CALIBER 9 Installation Guide:

Grille Mounts for Toyota FJ Cruiser Main Grille and/or Bumper Grille

Parts Included:

2 - Grille Brackets, 4 - Mounting Bars, 4 – 3/8” Washers 4 – 3/8” Lock Nuts

Tools Required:

Scissors, 3/8’ Wrench, Saw and **Anti Seize**

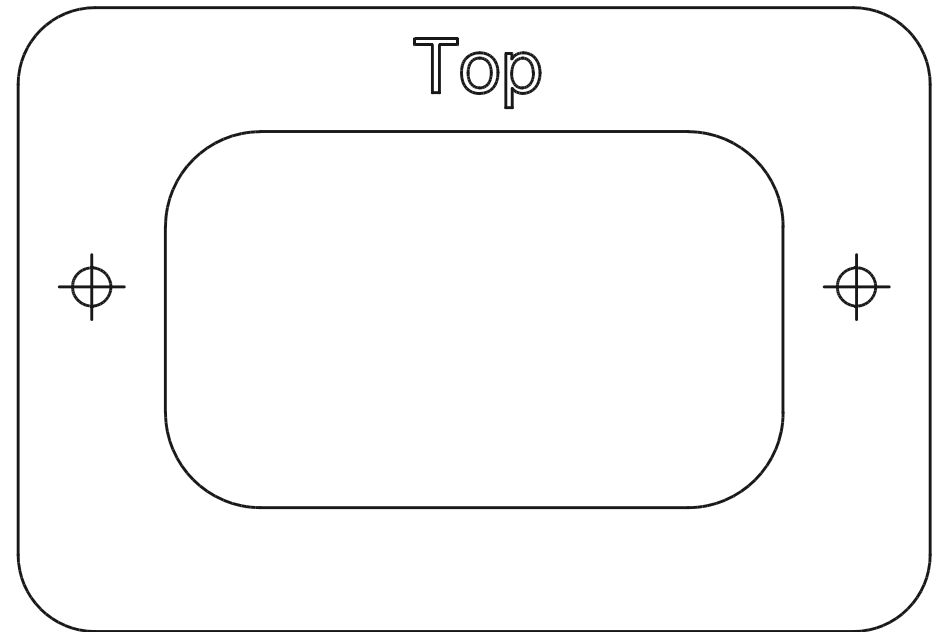

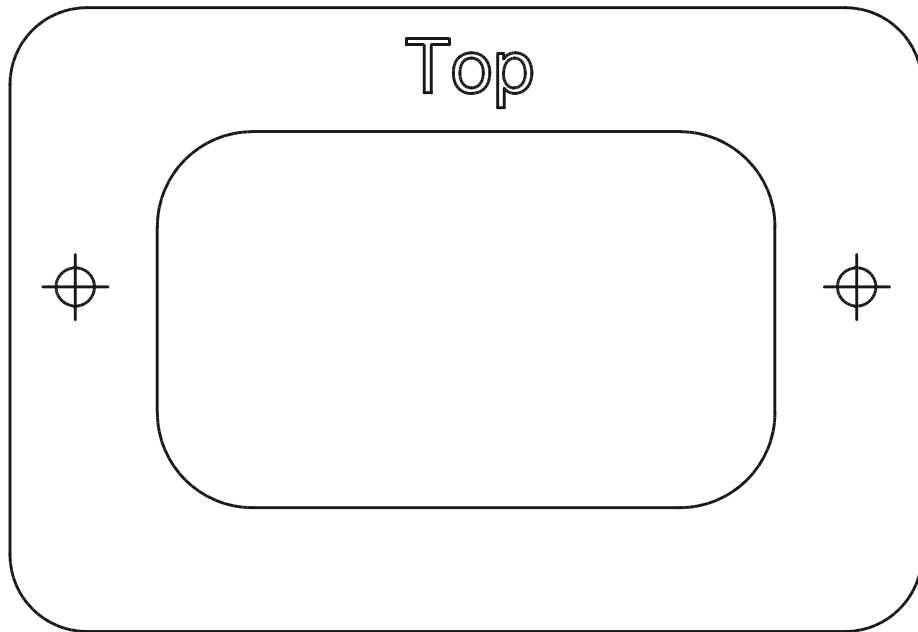

Step 1: Using scissors cut out templates below. The bracket for the LED is located on the top of the mount. The LED will hang down from the mount.

Step 2: Using templates, locate preferred location of the mounts. Be sure you have proper clearance for the studs as noted by holes.

Step 3: Cut area of grille located in center of template. Provide enough clearance for the LED to avoid contact with the grille.

Step 4: Install LEDs in Mounts with hardware provided with the LEDs and then proceed to install mounts into grille with hardware provided. **Add Anti Seize to studs prior to installing lock nuts.**

Step 5: Follow LED manufacturer’s wiring instructions to complete installation.
