## **BAKFLIP HARD FOLDING BED COVERS**

If you're looking for a hard truck bed cover that does it all, the BAKFlip Series is it. From sleek contemporary styling to state of the art functionality, BAKFlip hard folding truck bed covers are sure to impress.

Constructed from tough aluminum or composite panels, all BAKFlip covers offer tough security, operate easily from either side of the truck, perform in all climates, provide full access to stake pockets, and most importantly, offer 100% unobstructed access to your entire truck bed. Hauling large items in your truck is never a problem. The ability to lock and load is finally an option with the patented features that only a BAKFlip can offer.

### **FINISH FUNDAMENTALS**

With all BAKFlips, you can expect a sleek, low-profile look, complemented by a stylish finish that provides its own set of beneficial features that work with the cover to protect the bed of your truck and the items within it. Check out our BAKFlip finishes comparison video, and explore the feature lists below to learn more.

Vinyl

**VP**

#### **VINYL**

- Marine-Grade, Leather Grain Vinyl
- Solid Aluminum/EPS Substrate
- Sleek Hinge-less, One-Piece Design
- Best-in-Class Water Resistance

## COMMON CHARACTERISTICS

All covers within the BAKFlip Series share a set of core features and benefits that are guaranteed to help you get the most out of your truck bed. Each feature listed below speaks to the strength, durability and functionality of all BAKFlip truck bed covers, and will enhance the way you use your truck on a daily basis.

### 100% PERCENT BED ACCESS

BAKFlip folds completely forward for 100% bed access to load large equipment. Prop Rods lock the cover open to allow driving in the flipped up position with the bed loaded.

### 3RD BRAKE LIGHT VISIBILITY

BAKFlip's patented design allows the cover to fold past 90 degrees and maintain visibility of OEM safety equipment. (\*short and standart bed only)

### AUTOMATIC LATCHING SYSTEM

Panel latches secure to the rail automatically when folded down. Simply fold back the cover, lock your tailgate and go!

### CAB PROTECTION

Bumpers protect the cab and rear window when the cover is in the flipped up position. By folding the cover past 90 degrees, it protects the cover from damage that can be caused by shifting cargo in the bed.

### EASY TO USE

Simply release each BAKFlip panel with quick release cables from either side to fold the cover forward.

### INCREMENTAL BED ACCESS

New self-contained buckle system secure the BAKFlip in the folded position behind the cab. This allows driving while partially open with complete rear window visibility.

## NO DRILL INSTALL

All BAKFlip install in minutes using easy-to-use clamps that mount the rails to the truck bed.

## SECURITY

By simply locking your tailgate, release cables are out of reach, securing the contents of your truck bed.

## SLEEK, NO PROFILE DESIGN

BAKFlip is the perfect complement any truck with its flush fit and streamlined profile.

## STAKE POCKET ACCESS

The unique BAKFlip design allows 100% access to the OEM stake pocket holes to mount a host of other accessory options.

## STAY ORGANIZED

BAKBox2 can be added to any BAKFlip model for full size trucks to organize small parts in the bed.

## WEATHER RESISTANT

EPDM rubber seals keep the elements out and allow BAKFlip to perform in the most extreme weather conditions to keep your cargo dry and secure.
