

## Tripod

US Pat. 5,474,330

BAL's King Pin Stabilizing Jacks are designed to offer a more firm and stable camping experience by supporting the king pin hitch on a fifth wheel travel trailer. Once the King Pin Stabilizing Jack is installed, you can tension the Jack against the hitch by tightening our patented foldable drive screw or tension ratchet. This tension helps prevent movement associated with the heavy overhang of a fifth wheel trailer.

### Deluxe Tripod

**Model 25035**

- Foldable drive screw helps tension jack to trailer pin
- Includes three extension legs for extra height & support
- Height adjustment: 44" to 66"

### Standard Tripod

**Model 25033**

- Foldable drive screw helps tension jack to trailer pin
- Economy model with three fixed legs
- Optional 25001 Extension Leg can be added
- Height adjustment: 44" to 50"

### Gooseneck Tripod
