

## Power Steering Products - Benefits & Features Steering Pumps

Feature:

1

All critical components are inspected and gauged.

Benefit:

Detects worn components needing to be replaced to prevent leaks and ensure proper performance.

Feature:

(2)

Cleaned and inspected at multiple stages in the manufacturing process.

Ronofit:

Eliminates corrosion and rust prior to component assembly ensuring long service life.

Feature:

(3)

Seals and O-rings are replaced with new, OE-equivalent parts.

Benefit:

Extended life and reliability of the pump.

Feature:

4

Sealing surfaces are polished, restored and checked for smoothness.

Benefit:

Maximum sealing to eliminate leaks and ensure long service life of the pump.

Feature:

**(5)** 

Assembled units 100% functionally tested for leaks and performance prior to packaging.

**Benefit:** 

Guarantees unit performance that meets OE specifications.
