

BD Cummins Flex Plate **For 1994-2016 Dodge Ram Diesel Trucks**

1041210	Dodge 5.9L Cummins (47RE,47RH,48RE)	1994-2007
1041221	Dodge 6.7L Cummins (68 RFE only)	2007¹/₂-2016

PLEASE READ ALL INSTRUCTIONS BEFORE INSTALLATION.

- 2 times thicker than stock
- Manufactured using 1045 Billet forge.
- 300% less radial run-out compared to other aftermarket flex plates
- SFI 29.3 approved for high horsepower diesel applications
- Not affected by hydrogen embrittlement which can drastically reduce strength.
- 350% better fatigue strength than aluminum
- Correct ring gear that won't damage starter.
- Fits with any size torque convertor (OEM or Aftermarket)

**** Cautionary Note ****

Please read the disclaimer before proceeding to install this unit. Do not install unit if you do not agree with the disclaimer.

Installation

1. Remove the factory flex plate and the large steel washer.
2. Install the BD Flex plate, reusing the factory steel washer. Tighten the 8 factory bolts in a criss-cross pattern, to the factory torque specifications described below.

Factory Torque Specifications

5.9L	Flexplate to Crank	100 lbs-ft	Flexplate to Torque Converter	33 lbs-ft
6.7L	Flexplate to Crank	100 lbs-ft	Flexplate to Torque Converter	65 lbs-ft

SFI 29.3 certifications are good for 3 years from the date of manufacture. The manufactured date can be found on the SFI sticker.
