Sugerencias de Instalación

Antes de empezar a instalar esta unidad, lea atentamente todas las instrucciones.

Para un buen ajuste:

Para facilitar la instalación, el producto debe instalarse a temperaturas superiores a 72 °F (22 °C).

Por debajo de esta temperatura, la tela puede encogerse una pulgada o más, lo que dificultaría su ajuste al vehículo.

Es normal que la tela se contraiga o arrugue cuando está guardada en la caja de empaque. A los pocos días después de la instalación, la tela se relajará y las arrugas desaparecerán.

ADVERTENCIA

Este producto se diseñó principalmente para mejorar la apariencia del vehículo y proteger a los ocupantes de las condiciones climáticas comunes. De ninguna manera piense que los componentes de este producto pueden servir como medio de contención para los ocupantes del vehículo o que pueden protegerlos contra lesiones o la muerte en caso de accidente. Este producto no protegerá a los ocupantes contra caídas de objetos. Nunca conduzca este vehículo fuera de las especificaciones del fabricante.

USE LOS CINTURONES DE SEGURIDAD EN TODO MOMENTO

Lea y siga con precisión todas las instrucciones de instalación que se proporcionan para instalar este producto. Si no lo hace, podría producirse un mal ajuste que colocaría a los ocupantes del vehículo en una situación potencialmente peligrosa.

PRECAUCIÓN

Debe usar gafas protectoras en todo momento durante la instalación de este producto.

Conseils pour l'installation

Lire toutes les instructions au complet avant de commencer l'installation de cet assemblage.

Pour un ajustement sans problème :

Afin de faciliter l'installation, ce produit doit être installé à des températures au-dessus de 72 °F (22 °C).

Sous cette température, le tissu peut rétrécir d'un pouce (2,5 cm) ou plus, ce qui rendra l'ajustement sur le véhicule difficile.

Il est normal que le tissu rétrécisse et plisse pendant qu'il est dans la boîte d'expédition. En quelques jours après l'installation, le tissu se détendra et les plis disparaîtront.

Care and Maintenance of your Bestop Product

Your Bestop product is made of the finest materials available. To keep it looking new and for the maximum possible life, it will need periodic cleaning and maintenance.

Fabric: The fabric should be washed often using soap, warm water and a soft bristle brush. Rinse with clear water to remove all traces of soap. Bestop recommends using **Bestop Cleaner** (part no. 11201-00) and **Bestop Twill Protectant** (part no. 11207-00) which are specially formulated to provide a total cleaning and protection system

Windows: Keep windows clean to avoid scratching. DO NOT use a brush on the windows! Wash with a water-soaked cloth or sponge and a mild dishwashing detergent. Bestop recommends Bestop Vinyl Window Cleaner (part no. 11203-00), which safely cleans and protects vinyl windows and helps prevent UV damage. NEVER WIPE THE WINDOWS WHEN THEY ARE DRY. Be careful when cleaning snow or frost from the vinyl windows since they are easily scratched and may crack at low temperatures. DO NOT roll the sides or rear window in cold weather. The windows become stiff and will crack. Cracks caused by misuse in cold temperatures are not covered under warranty.

Zippers: Keeping zippers cleaned and lubricated with Bestop's Zipper Cleaner (part no. 11206-00) will help prevent damage and keep the zippers in smooth working condition. If a zipper opens behind the slider, the slider may have been spread apart. This problem can usually be repaired by using an ordinary pair of pliers to bring the sides back into parallel. Return slider to the end of the zipper in the normal Open position. Squeeze lightly at first and test the zipper. If the zipper continues to remain open squeeze more firmly with the pliers and try the zipper again. Repeat this procedure until the zipper operates correctly.

Water: Seeping through at the seams may be stopped by applying 3-M Scotchgard® on the inside of the seams. Rips in the fabric may be repaired with Bondex® iron on patches. Iron the patches to the Inside of the top, carefully following the Bondex® instructions.

Snaps: Keep snaps cleaned and lubricated with silicone to help prevent snaps from sticking to the studs. If a snap does become stuck to a stud, use a screwdriver and GENTLY pry apart to prevent permanent damage to the snap or the top fabric.

Soin et entretien de votre produit Bestop

Votre produit Bestop est fabriqué des meilleurs matériaux disponibles. Il devra être nettoyé et entretenu régulièrement afin de maintenir son apparence neuve et pour une durée d'utilisation maximale.

Tissu : Le tissu doit être lavé régulièrement à l'aide de savon, d'eau chaude et d'une brosse à soies douces. Rincer à l'eau claire afin d'éliminer toute trace de savon. Bestop recommande d'utiliser son **Bestop Cleaner** (pièce no 11201-00) et **Bestop Twill Protectant** (pièce no 11207-00) which qui sont spécialement formulés pour fournir un système complet de nettoyage et de protection.

Vitres : Maintenir les vitres propres pour éviter de les égratigner. NE PAS utiliser une brosse sur les fenêtres. Laver avec un chiffon ou une éponge imbibée d'eau et d'un savon à vaisselle doux. Bestop recommande Bestop Vinyl Window Cleaner (no de pièce 11203-00), lequel nettoie et protégé les vitres de vinyle et aide à prévenir les dommages causés par les UV. NE JAMAIS ESSUYER LES VITRES ALORS QU'ELLES SONT SÈCHES. Prendre soin de bien enlever la neige ou le givre des vitres de vinyle parce qu'elles peuvent être égratignées facilement et peuvent fissurer à de basses températures. NE PAS rouler les vitres latérales ou arrière par temps froid. Les vitres deviennent dures et elles fissureront. Les fissures causées par une mauvaise utilisation par temps froid ne sont pas couvertes par la garantie.

Fermetures à glissière : Maintenir les fermetures à glissière propres et lubrifiées à l'aide du nettoyant Zipper Cleaner (no de pièce 11206-00) de Bestop aidera à protéger des dommages et maintiendra les fermetures à glissière en bon état de fonctionnement. Si une fermeture à glissière ouvre derrière la glissière, la glissière peut avoir été forcée au point de s'ouvrir. Le problème peut habituellement être réparé en utilisant des pinces ordinaires pour remettre les côtés parallèles. Remettre la glissière au bout de la fermeture à glissière, dans la position Ouverte normale. Serrer légèrement au début et vérifier le fonctionnement de la fermeture à glissière. Si la fermeture à glissière continue de rester ouverte, serrer plus fortement à l'aide des pinces et essayer la fermeture à glissière de nouveau. Répéter le processus jusqu'à ce que la fermeture à glissière fonctionne correctement.

Eau : Les infiltrations d'eau aux coutures peuvent être arrêtées par l'application de Scotchgard® 3M sur l'intérieur des coutures. Les déchirures dans le tissu peuvent être réparées grâce aux pièces thermocollantes Bondex®. Fixer les pièces thermocollantes à l'aide d'un fer à repasser sur l'intérieur du toit, en suivant soigneusement les instructions de Bondex®.

Boutons pression : Maintenir les boutons pression propres à l'aide de silicone pour empêcher les boutons pression de coller aux rivets. Si un bouton pression reste collé à un rivet, utiliser un tournevis et appliquer une FAIBLE PRESSION afin d'éviter d'endommager le bouton pression ou le tissu du toit.

Cuidado y mantenimiento de su producto Bestop

Su producto Bestop está hecho con materiales de la más alta calidad. Para mantener su aspecto nuevo y alargar su vida útil al máximo posible, necesitará limpieza y mantenimiento periódicos.

Tela: debe lavar la tela con frecuencia usando jabón, agua tibia y un cepillo de cerdas suaves. Enjuague con agua limpia para eliminar todos los residuos de jabón. Bestop recomienda usar **Bestop Cleaner** (núm. de parte 11201-00) y **Bestop Twill Protectant** (núm. de parte 11207-00) que están formulados especialmente para proporcionar un sistema de limpieza y protección total.

Ventanas: mantenga las ventanas abiertas para evitar que se rayen. ¡NO use cepillo para lavar las ventanas! Lave con un paño o esponja empapado de agua y un detergente suave para lavar platos. Bestop recomienda usar el limpiador de ventanas de vinilo Bestop (número de parte 11203-00), que limpia de manera segura y protege las ventanas de vinilo, además de ayudar a prevenir daños causados por los rayos UV. NUNCA LIMPIE LAS VENTANAS CUANDO ESTÉN SECAS. Tenga cuidado cuando limpie la nieve o escarcha de las ventanas de vinilo, ya que se rayan con facilidad y pueden agrietarse a temperaturas bajas. NO baje las ventanas laterales o la ventana de la parte posterior cuando haga frío. Las ventanas pueden ponerse rígidas y agrietarse. Esta garantía no cubre las grietas causadas por mal uso en temperaturas frías.

Cremalleras: conserve las cremalleras limpias y lubricadas con el limpiador de cremalleras Bestop (número de parte 11206-00), que ayuda a prevenir daños y mantiene las cremalleras en óptimas condiciones de funcionamiento. Si la cremallera se abre detrás de la corredera, es posible que las mordazas de la corredera se hayan separado. Por lo general, este problema se repara fácilmente con un par de pinzas comunes para volver a poner los lados en paralelo. Regrese la corredera al extremo de la cremallera en la posición abierta normal. Apriete un poco al principio y pruebe la cremallera. Si la cremallera sigue abierta, apriete con mayor firmeza con las pinzas y vuelva a probar la cremallera. Repita este procedimiento hasta que la cremallera funcione correctamente.

Agua: para eliminar la filtración de agua por las costuras, aplique cinta Scotchgard® de 3-M en la parte interior de las costuras. Los rasgones de la tela pueden repararse con parches Bondex® que se aplican con plancha. Planche los parches en el interior de la capota, siguiendo con cuidado las instrucciones de Bondex®.

Broches: conserve los broches limpios y lubricados con silicona para evitar que se peguen a los corchetes de encaje. Si un broche se queda pegado a un corchete, use un destornillador y CON CUIDADO separe las dos piezas para evitar daño permanente al broche o a la tela de la capota.
