- Certificate (removable) for:

AUDI A4 (B9) B16 PSS10 sedan/ station wagon -

- mounting instruction

Before installation please observe the following points:

- Read all information in this manual carefully.
 All suspension components are fitted and removed acc. to the manufacturer's specifications for installing and removal, if not otherwise required in these instructions.
 - Check that your vehicle type is listed in the certificate as being specified for this kit.
 - Check the product for all components before starting installation!
- Check that dimensions and fastening points are comparable between the original and BILSTEIN shock absorbers.
- Directional references (left, right, front, rear) are always with reference to the driving direction.
 - Remove the negative battery pole.
 - The test vehicles are left- hand drive vehicles.

After installation please observe the following points:

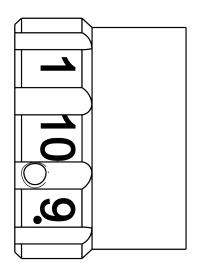

- Set the vehicle height by adjusting spring plates and lock nuts on the new dampers. Only use the supplied spanner wrenches.
- All rubber- mounted strut/ damper attachments must not be fully tightened until AFTER the suspension system is loaded (wheels on the ground). Other mounting fasteners (for example brackets) must be securely tightened BEFORE load is placed on the suspension system.
- Because the vehicle has been lowered, freedom of movement (clearance) for all wheel-/tire- combinations must be checked.
 - Connect the negative battery pole. -
 - After installing the suspension system, caster and camber must be checked and adjusted according to manufacturer's specifications.

 Check and reset load- dependent brake compensator and ABS system according to manufacturer's specifications.
 - Check and adjust headlight setting. -

All diagrams are generalized and not to scale! brackets, etc. specific to strut are not shown!

position 1 = comfort position 10 = sport

During the adjustment you will hear a positive " click" at each position of the adjustment.

Instruction for the front axle

The adjusting element of the front struts is located at the bottom edge of the strut.

Adjusting position must aligned with the red mark on outer tube.

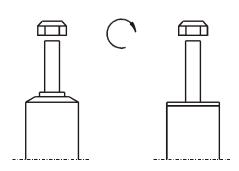

Status of delivery is position 1.

Instruction for the rear axle

Adjusting position must aligned with the red mark below adjusting knob.

Status of delivery is position 1.

list of torques						
Thread	M 16	M 14	M 12	M 10	М8	
Torque Nm	110	72	45	25	13	
Torque ft lb	83	54	34	19	10	

Do not use an impact tool to loosen or tighten fasteners due to possible damage to the product.

Self- locking nuts must only be used once!

mounting instruction for front axle B16 PSS10

Removal shock absorber

Place vehicle on a wheel- free car hoist, lift it and remove wheels.

Vehicles equipped with xenon headlight the sensor for the headlamp levelling controller must removed before.

Pay attention that support wires of brake system are strain-free during removal. Stabilization by suitable means is demanded.

Remove bottom mounting.

Remove top fixing nuts from support bearing. **Do not remove central nuts at this time!**

Remove complete shock absorber and clamp it in an appropriate strut vice.

Using a suitable spring compressor, compress suspension spring until tension on support bearing is free to move.

Release central nut and remove original mounting parts and coil spring. Please refer to diagram to identify which parts will be replaced with BILSTEIN- supplied components.

PSS10- 10 step- pin adjustment

The adjustment unit must be deinstall before the shock absorber installation can be completed in reverse order to before with BILSTEIN and/ or original mounting parts.

OE= Original Equipment

B= Delivered by BILSTEIN

A Set screw

C Adjusting head

D lock nut M12x 1

E end stop disc

F lock nut M12x 1

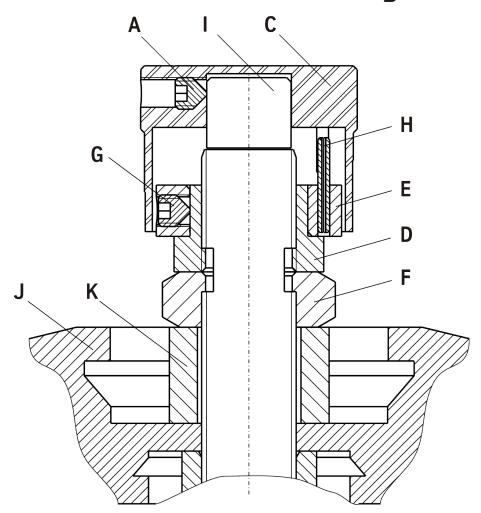

G set screw

H end stop pin

I Adjusting screw

J OE Support bearing

K sleeve

position 1 = comfort (counter-clockwise direction) position 10 = sport (clockwise direction)

Note

Status of delivery is position 10.

Removal Adjustment Unit PSS10

(see previous sketch)

To remove the adjusting head (C) the set screw (A) must loose.

Remove end stop disc (E) together with lock nut (D). Remove nuts (F).

Now remove all original mounting parts and fit BILSTEIN and/ or original mounting parts in reverse order to removal.

Installation Adjustment Unit PSS10

For fitting support bearing on shock absorber please choose flat fork spanner!

After installing support bearing (J) tighten nut (F) with sleeve (K) to block. Tighten lock nut (D).

Pins (H) are end stops.

Place the adjusting head (C) flat on the adjusting screw (I) and turn it clockwise to end stop.

Fix the adjusting head (C) with set screw (A).

The adjusting head should move easily and with distinct "clicks" at each adjustment position. If not, disassemble the adjustment unit and reassemble acc. to the instruction.

Installation shock absorber

Assemble BILSTEIN and/ or original mounting parts, as well as the new BILSTEIN spring on the BILSTEIN strut in reverse order to removal.

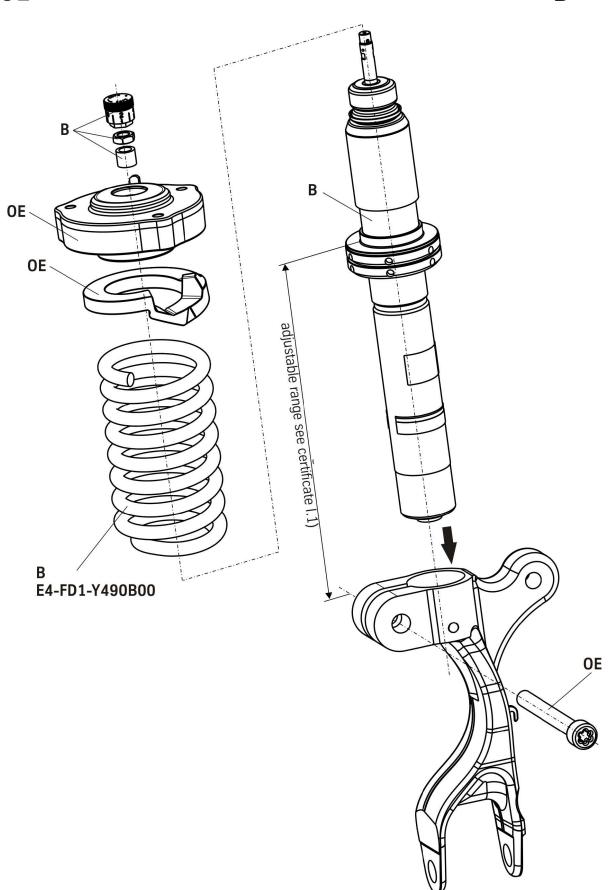

IMPORTANT! Spring plates must not be adjusted outside the ranges specified in the certificate!

Fit assembled shock absorber to the vehicle in reverse order to removal.

mounting instruction for rear axle

OE= Original Equipment

Einbau

BILSTEIN Anbauteile, siehe Darstellung unten, montieren.

BILSTEIN- Stoßdämpfer in umgekehrter Reihenfolge, analog zum Ausbau, montieren.

Remove

Place vehicle on a wheel free car hoist, lift it and remove wheels.

Pay attention that support wires of brake system are strain-free during removal. Stabilization by suitable means is demanded!

0

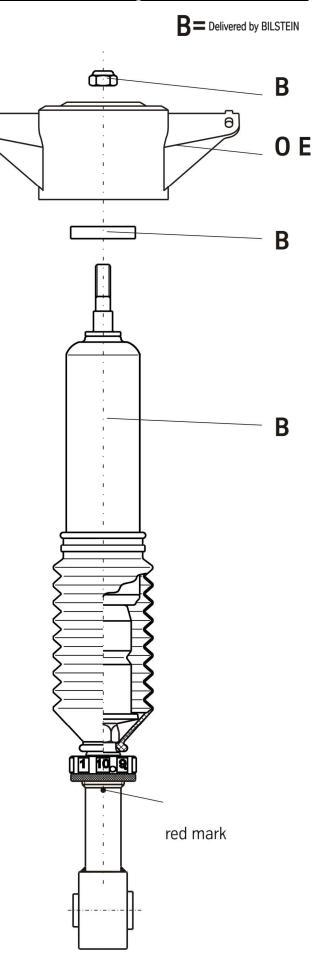

Remove top fixing mount and bottom fixing mount from support bearing.

Remove original shock absorber.

Installing

Fit BILSTEIN mounting parts on BILSTEIN shock absorber according to the sketch alongside.

Fit BILSTEIN shock absorber to the vehicle in reverse order as removal.
