## 4 Diode with 50 Ohm Resistors Wiring Kit Installation Instructions

**WARNING:** Incorrect wiring may result in blown fuses, damaged wiring, fire, or bodily injury. Blue Ox recommends installation of this kit by a trained professional. Blue Ox will not be responsible for any personal property damage, or bodily injury caused by incorrect wiring or misuse of this product.

1. Remove the vehicles tail light housings on both the driver and passenger side by removing the fasteners holding them into place. Pull the tail light housings away from the vehicle, being careful not to break the alignment tabs or housing.
2. Using a 12V continuity tester, identify the “hot” wires which power the brake lights.  
**NOTE:** The vehicle lights must be on in order for wires to be “hot”.
3. After all the light wires are identified and marked, shut off the power to the wires. Cut each wire roughly in the middle, leaving enough room to strip the ends of the wires and attach the supplied female couplings.
4. Starting on the passenger side, attach the couplings to the appropriate wires and to one end of the 12’ green and brown wires. Plug the corresponding ends into the diode blocks. Reinstall the passenger side housing.
5. Securely route the 12’ wires over to the driver side housing.
6. On the driver side attach the couplings to the appropriate wires, tying both the 12’ brown wire and the brown wire from the 26’ harness together. Connect the open end of the 12’ green wire to the green wire of the 26’ harness with the butt connector. Plug the corresponding ends into the diode blocks
7. Secure the ground wire to a metal part of the chassis using the provided self tapping screw. (It is recommended to attach the ground behind the driver side tail light housing)
8. Reinstall the driver side housing. Secure any excess wiring and route the wiring harness to the front of the vehicle.
9. Run the wire harness to the front of the vehicle and insert into the plug. Check the operation of all signals.

4 Diode with 50 Ohm Resistors Wiring Kit  
Installation Instructions

**Tools Required**  
12V Continuity Tester  
Wire Stripper  
Wire Cutter  
Terminal Crimper

Item No.	Part No.	Description	Qty.
1.....	194-0296 .....	26' Wiring Harness with Resistors .....	1
2.....	294-0398 .....	Female Terminal Coupling, 22-18 Ga .....	4
3.....	201-0654 .....	#10-16 x 1" Self Drilling Screw .....	1

**194-0296 (26' Wiring Harness with Resistors)**

Item No.	Part No.	Description	Qty.
1.....	294-0562 .....	26' Wire Harness .....	1
2.....	294-1118.....	50 Ohm Resistor .....	2
3.....	294-0660 .....	Diode Module, 6 Amp .....	4
4.....	294-0398 .....	Female Terminal Coupling, 22-18.....	8
5.....	294-0187 .....	5/16" Standard Ring Terminal, 16-14 GA.....	1
6.....	194-0297 .....	16 GA Brown Wire, 3" .....	3
7.....	194-0298 .....	16 GA Brown Wire, 134" .....	1
8.....	294-0250 .....	Butt Connector, 16-14 GA .....	1
9.....	194-0299 .....	16 GA Green Wire, 138" .....	1
10.....	194-0300 .....	16 GA Green Wire, 7" .....	1
11.....	194-0301 .....	16 GA Yellow Wire, 7" .....	1
