

SKY RIDGE SERIES

Sometimes you just need to get out there. To a place where the busses don't run, past where the pavement ends, beyond the reach of the last cell tower. Out where the spaces are wide open, the skies are endless, the air is clean. You want to feel the freedom. Breathe it. And if you'd rather be Live It than rough it when you get there, the Sky Ridge series of outdoor adventure products will be there for you. Because they mount to your adventure vehicle, they become a part of it, ready at a moment's notice to hit the trail. From roof-top tents and annex rooms to vehicle-mounted awnings and accessories, the Sky Ridge series are back country living solutions engineered to go wherever you go.

Adjust privacy, natural light, and airflow with the covered entrance, skylight and three large view windows with mosquito	to about the size of a briefcase. Wall height is adjustable to accommodate vehicles of different heights as well as setting up on uneven terrain. Annex walls are made of 420D Ripstop Polyester Oxford fabric, polyurethane coated for 2500 mm waterproofing. Annex floor is made of 550GSM PVC coated waterproof fabric with heavy duty weather resistant zipper; the Annex may be set up with or without the floor installed. Entry door and two large windows with mosquito netting and solid flaps. A "back door" provides access to the vehicle's side door	polyurethane coated for 2500 mm waterproofing. Quick setup and take-down makes deploying the awning feasible for long stays or quick lunch breaks along the trail. Self-contained unit includes rugged, light-weight extruded aluminum telescopic legs and arms, with twist-lock fixtures. Stakes and tie-down straps are included to secure the awning for use in windy and inclement conditions. The heavy duty travel cover is made of sturdy, UV resistant 680GSM/1200D PVC coated tarpaulin material with heavy duty
	the 60 mm thick (2.4") high density foam mattress with removable/washable cover. The folding tent base is made of sturdy aluminum structural tubing with an insulated core and scratch resistant aluminum deck to provide a solid platform. Heavy duty telescoping aluminum ladder extends to 90.55" (60 mm) maximum length to accommodate virtually any vehicle height or camping on uneven terrain. Easy for a single person to quickly set up and take down without tools. Made entirely of corrosion-resistant materials including aircraft- grade 6061 aluminum framing and marine grade stainless steel hinges and hardware. Very light-weight, at just over 100 lbs. Light weight is extremely important for roof-mounted components, to maintain the vehicle's stability in uneven terrain. The tent walls and roof are manufactured with 280GSM Ripstop reinforced polyester/cotton canvas, polyurethane coated for 2000mm waterproofing. Adjust privacy, natural light, and airflow with the covered entrance, skylight and three large view windows with mosquito netting, exterior awnings and literior zip-up closures. The separate rain fly is manufactured from 420D Polyester Oxford fabric, polyurethane coated for 2500 mm waterproofing.	to about the size of a briefcase.
