TECH Bulletin – Toyota Center Cut Key Compatibility

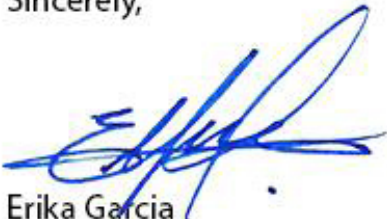

To Whom It May Concern,

It has come to our attention that there has been some confusion regarding the compatibility of the Toyota Center Cut Keys with the BOLT line of locks. Currently BOLT Locks do not support Toyota Center Cut Keys. These keys are distributed as emergency keys within Toyota vehicles that have a push button start or a passive entry/passive start system.

The good news is that these vehicles also come with a regular mechanical key for use with the tailgate lock. This mechanical key will work with any of our Toyota BOLT Locks.

If you have any questions regarding the compatibility of Toyota vehicle keys please do not hesitate to contact me.

Sincerely,

Erika Garcia
National Sales Manager
