

Installation Guide for Chevrolet Silverado/GMC Sierra 1500 5.3L PNs 140842, 140842BC

******* Please compare the parts in the box with the bill of materials provided *****
to assure that you have all the parts necessary for this installation.**

These instructions have been written to help you with the installation of your Borla Performance exhaust system. Please read this document completely before beginning the installation of your system.

Thank you for purchasing a Borla Performance Cat-Back™ exhaust system.

These Borla Performance Cat-Back™ exhaust systems (PNs 140842, 140842BC) are designed for the Chevrolet Silverado/GMC Sierra 1500 Regular Cab Standard Bed (126" wheelbase), equipped with a 5.3L V8 engine and 2WD or 4WD automatic transmission.

Borla Performance Industries recommends that an exhaust shop or professional after market parts installer, who has all the necessary equipment, tools and experienced personnel needed for proper installation, should perform the installation of this system. However, if you decide to perform the installation, we recommend someone should help you. Ensure the installer uses all under car safety precautions including eye protection.

Please take time to read and understand the following...

By installing your Borla Performance exhaust system, you indicate that you have read this document and you agree with the terms stated below.

It is the responsibility of the purchaser to follow all installation instruction guidelines and safety procedures supplied with your Borla Performance exhaust system.

Borla Performance Industries assumes no responsibility for damages occurring from misuse, abuse, improper installation, improper operation, lack of responsible care, or all previously stated reasons resulting from incompatibility with other manufacturer's products and/or systems.

Included with your Borla Performance exhaust system is a warranty card. Please read it carefully before you begin any work on your vehicle. If you should have any questions regarding our warranty policy, installation, or any other matter pertaining to your new Borla Performance exhaust system, please give us a call at the number provided on the warranty card.

Minimum Required Tool List:

TOOLS:

1. 3/8” drive ratchet
2. 3/8” drive extension 6”
3. 15mm deep well socket
4. 13mm socket
5. 10mm socket
6. Pry bar

SHOP SUPPLIES:

1. Spray lubricant

Borla Performance - Bill of Materials

ITEM NO.	QTY.	PART NUMBER	DESCRIPTION
1	1	57148	FRONT PIPE ASSEMBLY
2	1	401424	MUFFLER: 12.10 X 7.85 X 16.00" LG. (29.91" OAL)
3	1	56984	Y-PIPE ASSEMBLY
4	1	57404	R/H TAILPIPE ASSEMBLY
5	1	620937	CROSS-OVER PIPE: DIA. 2.75 X 38.20"
6	1	57405	L/H TAILPIPE ASSEMBLY
7	2	56932	HANGER/BRACKET ASSEMBLY
8	2	90114	3.00 ACCUSEAL CLAMP
9	3	90116	S/S ACCUSEAL CLAMP: Ø2.75
10	2	91181	BOLT: M10-1.5X40. SERRATED-FLANGE HEX HEAD
11	2	470264	CLIP-ON BARREL NUT: M10 X 1.50mm THREAD
12	2	78998	RUBBER ISOLATOR

Caution!!! *Never work on a hot exhaust system. Serious injury in the form of burns can result if the vehicle has been in use and the exhaust system is hot, allow vehicle to cool for at least 1 hour. Always wear eye protection when working under any vehicle.*

Note: *It is our recommendation that you use a hoist or hydraulic lift to facilitate the installation of your new Borla Performance Exhaust System.*

Taking all under car safety precautions, lift the vehicle using a hoist or hydraulic lift. Once this has been done, you may begin the removal of your old exhaust system from your vehicle.

Note: *Before removing the original exhaust system from your vehicle, please compare the parts you have received with the bill of materials provided on the previous page to assure that you have all the parts necessary for the installation of your new Borla Performance Exhaust System.*

Note: *With a used vehicle, we suggest a penetrating spray lubricant to be applied liberally to all exhaust fasteners and allowing a significant period of time for the chemical to lubricate the threads before attempting to disassemble.*

Original Exhaust System Removal

1. Lubricate all hangers, rubber isolators, bolts and nuts.
2. Using a reciprocating saw, make a cut directly in front of the muffler (fig. 1).
3. Loosen the clamp nut connecting the front pipe to the vehicle (fig. 2).
4. Remove the front pipe from the vehicle (fig. 3).
5. Using a pry bar or a flat blade screwdriver, remove the tailpipe hanger from its rubber isolator (fig. 4).
6. Using a muffler stand or additional person to support the exhaust system, remove the muffler assembly hangers from their rubber isolator (fig. 5).

Original Exhaust System Removal Cont'd

7. Remove the muffler assembly and tailpipe from the vehicle, bringing the exhaust system forward over the axle (fig. 6).
8. Original exhaust system removed (fig. 7). Original exhaust system length will differ from that of the one pictured in this document.

Borla Performance Cat-Back™ Exhaust System Installation

9. Connect the front pipe to the vehicle using the original clamp (fig. 8). Actual front pipe length will differ from that of the one pictured in this document.
10. Insert the front pipe hanger into its rubber isolator.
11. Place a clamp on either end of the muffler assembly.
12. Connect the muffler assembly to the front pipe (fig. 9).
13. Insert the U-nut into the L/H side of the frame at the location pictured (fig. 10).
14. Install the L/H hanger and rubber isolator (fig. 11).
15. Slide a clamp over the inlet of the crossover pipe and connect it to the L/H outlet of the Y-pipe (fig. 12).

WARNING: Use extreme caution during installation. Torque all fasteners according to manufacturer's torque values and tightening sequence. **DO NOT** use air impact tools to tighten fasteners on Borla Performance Exhaust Systems. Use of such tools may result in bent flanges or gasket contact areas leading to exhaust leaks.

NOTE: When you first start your vehicle after the installation of your new Borla Performance Exhaust System, there may be some smoke and fumes coming from the system. This is a protective oil based coating used in the manufacturing of mandrel bent performance exhaust tubing. This is not a problem and will disappear within a very short period of time after the exhaust has reached normal operating temperatures.

Borla Performance Cat-Back™ Exhaust System Installation

9. Slide a clamp over the inlet of the L/H tailpipe assembly and connect it to the crossover tube (fig. 13).
10. Insert the L/H tailpipe hanger into the rubber isolator (fig. 15).
11. Slide a clamp over the inlet of the R/H tailpipe assembly and connect it to the R/H outlet of the Y-pipe assembly.
12. Insert the R/H tailpipe assembly hanger into the rubber isolator.
13. Check your exhaust system for proper clearance under the vehicle and also for tip alignment. Starting at front flanges and moving to rear of vehicle, tighten flange hardware bolts. Orient position of bolt (on supplied clamps) between (not over) pipe notches and tighten to 35 ft. lbs. torque.
14. Align tips (fig. 16) and tighten hardware. Loosen clamps to rotate or slide pipe for better alignment.
15. Before starting your vehicle, make sure to check all wires, hoses, brake lines, body parts and tires for safe clearance from the exhaust system.
16. Start the vehicle and check for any leaks. If any leaks are found, determine cause (such as loose or incorrectly positioned clamp) and repair as necessary.

WARNING: Use extreme caution during installation. Torque all fasteners according to manufacturer's torque values and tightening sequence. **DO NOT** use air impact tools to tighten fasteners on Borla Performance Exhaust Systems. Use of such tools may result in bent flanges or gasket contact areas leading to exhaust leaks.

NOTE: When you first start your vehicle after the installation of your new Borla Performance Exhaust System, there may be some smoke and fumes coming from the system. This is a protective oil based coating used in the manufacturing of mandrel bent performance exhaust tubing. This is not a problem and will disappear within a very short period of time after the exhaust has reached normal operating temperatures.
