## **THE PREMIUM WINTER TYRE RANGE**

FOR CARS, SUV/4x4s AND VANS

WINTER TYRE RANGE

## Did you know that your tyre contact patch is comparable to the size of a postcard?

Bridgestone Winter tyres have been specifically developed and designed to improve traction performance in the wet and snow by increasing the amount of bite edges to help you stay in control. It's important because our tyres are the only part of your car's safety system that actually touches the road. Engineered with your safety in mind. Bridgestone.

## FEEL SAFE, WHATEVER THE CONDITIONS

Bridgestone's full range of premium winter tyres delivers outstanding levels of safety, confidence and control, wherever you are and whatever the conditions. The full line-up covers the entire climate spectrum in Europe. From all-season tyres for milder, more temperate climates to lamellen tyres adapted to the variable and unpredictable conditions of central Europe to premium studless and studded tyres built for the extremes of a severe Nordic winter.

**Wherever you live, whatever vehicle you drive, Bridgestone has the right tyre to help you and your loved ones feel safe on the roads this winter.**

Meet the challenge of winter head on, armed with Bridgestone's advanced compound technologies, tread designs and construction techniques, all developed and tested in a wide variety of conditions. So you can tackle the toughest winter conditions, even when you least expect them.

## WHY WINTER TYRES?

As a general rule, **change to winter tyres as soon as you change your clock to winter time.** Winter tyres have a different rubber compound and pattern design which are specially designed for winter conditions:

### Benefits of winter tyres

- **Optimal grip and traction:** lamellen maintains grip on slippery surfaces while rubber remains flexible at low temperatures.
- **Reduced risk of aquaplaning:** efficient water/slush evacuation as a result of larger, deeper tyre grooves.
- **Enhanced safety on all winter surfaces:** combination of material and pattern design improves safety on all surfaces (snow, slush, ice and cold/dry).

### Benefits of alternating between summer and winter tyres

- Winter tyres are only marginally more expensive than summer tyres but **dramatically improve safety in winter conditions.**
- The cost of an additional set of tyres is offset by **the money you save by not using your summer tyres all year round.**

## WEATHER CONTROL

### YEAR-ROUND PERFORMANCE

You never know these days when winter will strike. But when it does, you can rest assured the Weather Control A001 will be there for you. Designed with the aim of safe, confident driving in predominantly milder winters, this versatile tyre has all the ingredients to deliver true, all-year-round performance. Incorporating Bridgestone's dedicated "all weather" silica compound and anti-aquaplaning tread design, the Weather Control A001 offers the performance you need, when you need it most.

### WEATHER CONTROL A001

#### Excellent wet and winter grip

Dynamic, confident handling all year round, balancing dry performance and wear resistance

#### Low risk of aquaplaning

Reliable braking and manoeuvring on wet surfaces

#### Reactive to fast-changing weather conditions

Superb handling and performance even on cold and frozen roads

# BLIZZAK

## OUTSTANDING CONTROL IN ALL WINTER CONDITIONS

They sure don't make winters like they used to! Which is why Bridgestone doesn't make winter tyres like they used to either. The award-winning Blizzak LM001 brings together new innovations in tread and materials technology, giving you the confidence and precision you need to face today's unpredictable conditions safely, surely and with total control.

# BLIZZAK LM001

TÜV TESTED ADAC GOOD

### Precision steering

Smooth, predictable response and comfortable control in all winter conditions

### High cornering stability

For confident performance from the city roundabout to the highway

### Superb grip on snow

For efficient, assured braking on fresh and compacted snow

# BLIZZAK

## PRECISION RESPONSE

Stand up to the challenges of winter with total peace of mind thanks to Bridgestone's cutting-edge winter technology. The Blizzak LM-32 and LM-32s deliver outstanding levels of grip in a variety of conditions. Giving you the confidence to power across wet, dry and frozen surfaces with total peace of mind.

Also available in RFT.

**BLIZZAK  
LM-32**

**BLIZZAK  
LM-32s**

TÜV TESTED

ADAC GOOD

**Reliable traction on snow, slush and ice**

Strong grip and short braking distances on snow, slush and ice

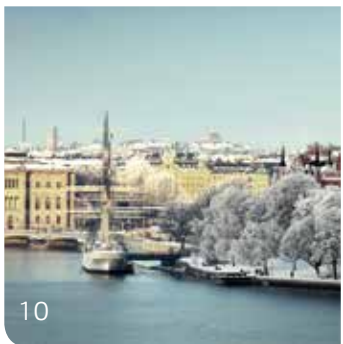

**Outstanding wet handling and control**

Rock-solid reliability in wet conditions while maintaining dry performance

**Confident handling in winter conditions**

High stability and responsiveness on a variety of winter surfaces

# BLIZZAK

## EXTREME ENDURANCE

When the going gets tough, the tough call on the outstanding safety, reliability and performance of Bridgestone's most advanced technologies. Built to satisfy both the extreme conditions and strict regulations of all Nordic countries, the Blizzak SPIKE-01 sets new standards for precision response and control in even the most trying road and weather conditions.

## BLIZZAK SPIKE-01

### Dynamic winter handling

Reliable braking and stable manoeuvring in all conditions

### Incredible response on ice and snow

Outstanding grip and braking performance on ice and hard, compacted snow

### New generation studded tyre

Developed and tested especially for Nordic winter conditions

# BLIZZAK

## ADVANCED WINTER TYRE FOR EXTREME NORDIC CONDITIONS

To get the best out of winter, you have to prepare for the worst. With the premium winter tyre that was built to tame the most extreme conditions of a Nordic winter. The Blizzak WS80 Multi-Cell winter tyre lets you tackle the full spectrum of severe winter conditions safely, reliably and with total confidence.

### BLIZZAK WS80

NEW

#### High steering accuracy

Rely on precision response when manoeuvring on both fresh and compacted snow and ice

#### True Nordic performance

Built for the extreme conditions and strict regulations of a Nordic winter

#### Excellent grip on snow and ice

Count on safe and reliable performance with excellent grip across the full breadth of winter driving conditions

# BLIZZAK

## ULTIMATE PERFORMANCE FOR YOUR SUV/4x4

Discover the true exhilaration of winter without compromising on safety, comfort or performance. The Blizzak LM-80 EVO has been developed specifically to meet the high demands of today's powerful 4x4s and SUVs in terms of performance, safety and response. Feel the difference of this tyre's outstanding handling and control on snow and ice as well as on wet and dry surfaces. For the ultimate winter driving experience.

### BLIZZAK LM-80 EVO

#### Precision steering on ice, snow and slush

Smooth cornering and predictable manoeuvrability across winter surfaces

#### Balanced wet and dry handling

Balanced front and rear turning force on wet and dry roads ensures a secure feel

#### Outstanding control

Giving you the confidence to power through all winter conditions

# **BLIZZAK**

## **PREMIUM SUV/4x4 TYRE FOR SEVERE WINTER CONDITIONS**

Unleash the full power of your SUV or 4x4 and experience the thrill of winter driving as it was meant to be. The all-new Blizzak DM-V2 is entirely in its element, even in the harshest Nordic conditions, giving you the confidence to power through ice and snow in safety, in comfort and in control.

### **BLIZZAK DM-V2**

**NEW**

#### **Dynamic winter handling**

Take on the most extreme winter conditions with confidence thanks to the tyre's progressive steering response

#### **Exceptional balance**

Feel the exhilaration and excitement of controlled, dynamic handling, even on the most challenging surfaces

#### **Outstanding grip on snow and ice**

Get the peace of mind of premium safety through outstanding precision response, whatever the road or weather conditions

# **BLIZZAK**

## **ROBUST RELIABILITY FOR YOUR VAN**

Keep your business on track this winter with Bridgestone's flagship lamellen light commercial vehicle winter range. Offering outstanding reliability and protection against all winter conditions, Bridgestone's advanced winter tyres for vans and light commercial vehicles boost both performance and wear resistance to help you get the most out of your fleet this winter.

**BLIZZAK W810**    **BLIZZAK LM-32C**

### **Outstanding winter handling**

Extreme levels of traction when braking and cornering on snow, ice and wet roads

### **Long-lasting performance**

Very high wear resistance and robust tread compound for long tyre life

### **Cost-effective operations**

Excellent durability and low rolling resistance deliver low total cost per km

# BLIZZAK

## SUPERIOR CONFIDENCE FOR YOUR VAN

Sharpen your competitive edge even in the most extreme winter conditions thanks to the Blizzak W995's excellent winter performance. Together with its advanced Multicell™ compound, the tyre's optimised tread pattern and profile combine outstanding reliability and protection with all the versatility of a studless tyre. To ensure the Blizzak W995 delivers where many others can't.

## BLIZZAK W995

### True Nordic performance

Outstanding safety and reliability in the most severe winter conditions

### Balanced braking on ice and snow

Reliable response on ice and when braking, accelerating and manoeuvring

### Outstanding economy and comfort

Low rolling resistance and pattern noise for efficient operations

## ALPINE SKI WORLD CUP

# PUSHING THE BOUNDRIES OF PERFORMANCE

Bridgestone invests heavily in developing technologies that deliver peak performance on winter roads. However, as a major sponsor of Audi FIS Alpine Ski World Cup events, we also help drive performance on the slopes.

As in previous years, the 2014/15 season produced some truly thrilling displays of speed, skill and endurance, pushing the bounds of sporting achievement in some of the most challenging conditions.

Grip, high-speed stability, braking, balance and control... whether you are facing the challenges of winter behind the wheel or on the slopes, the ingredients of success are the same in both cases.

1

### Stability

Going downhill or down the road, you need the reliability of stable, consistent performance to get where you're going.

2

### Control

Either by hitting the brakes or shifting your weight, you need the advantage of precision response at every turn.

3

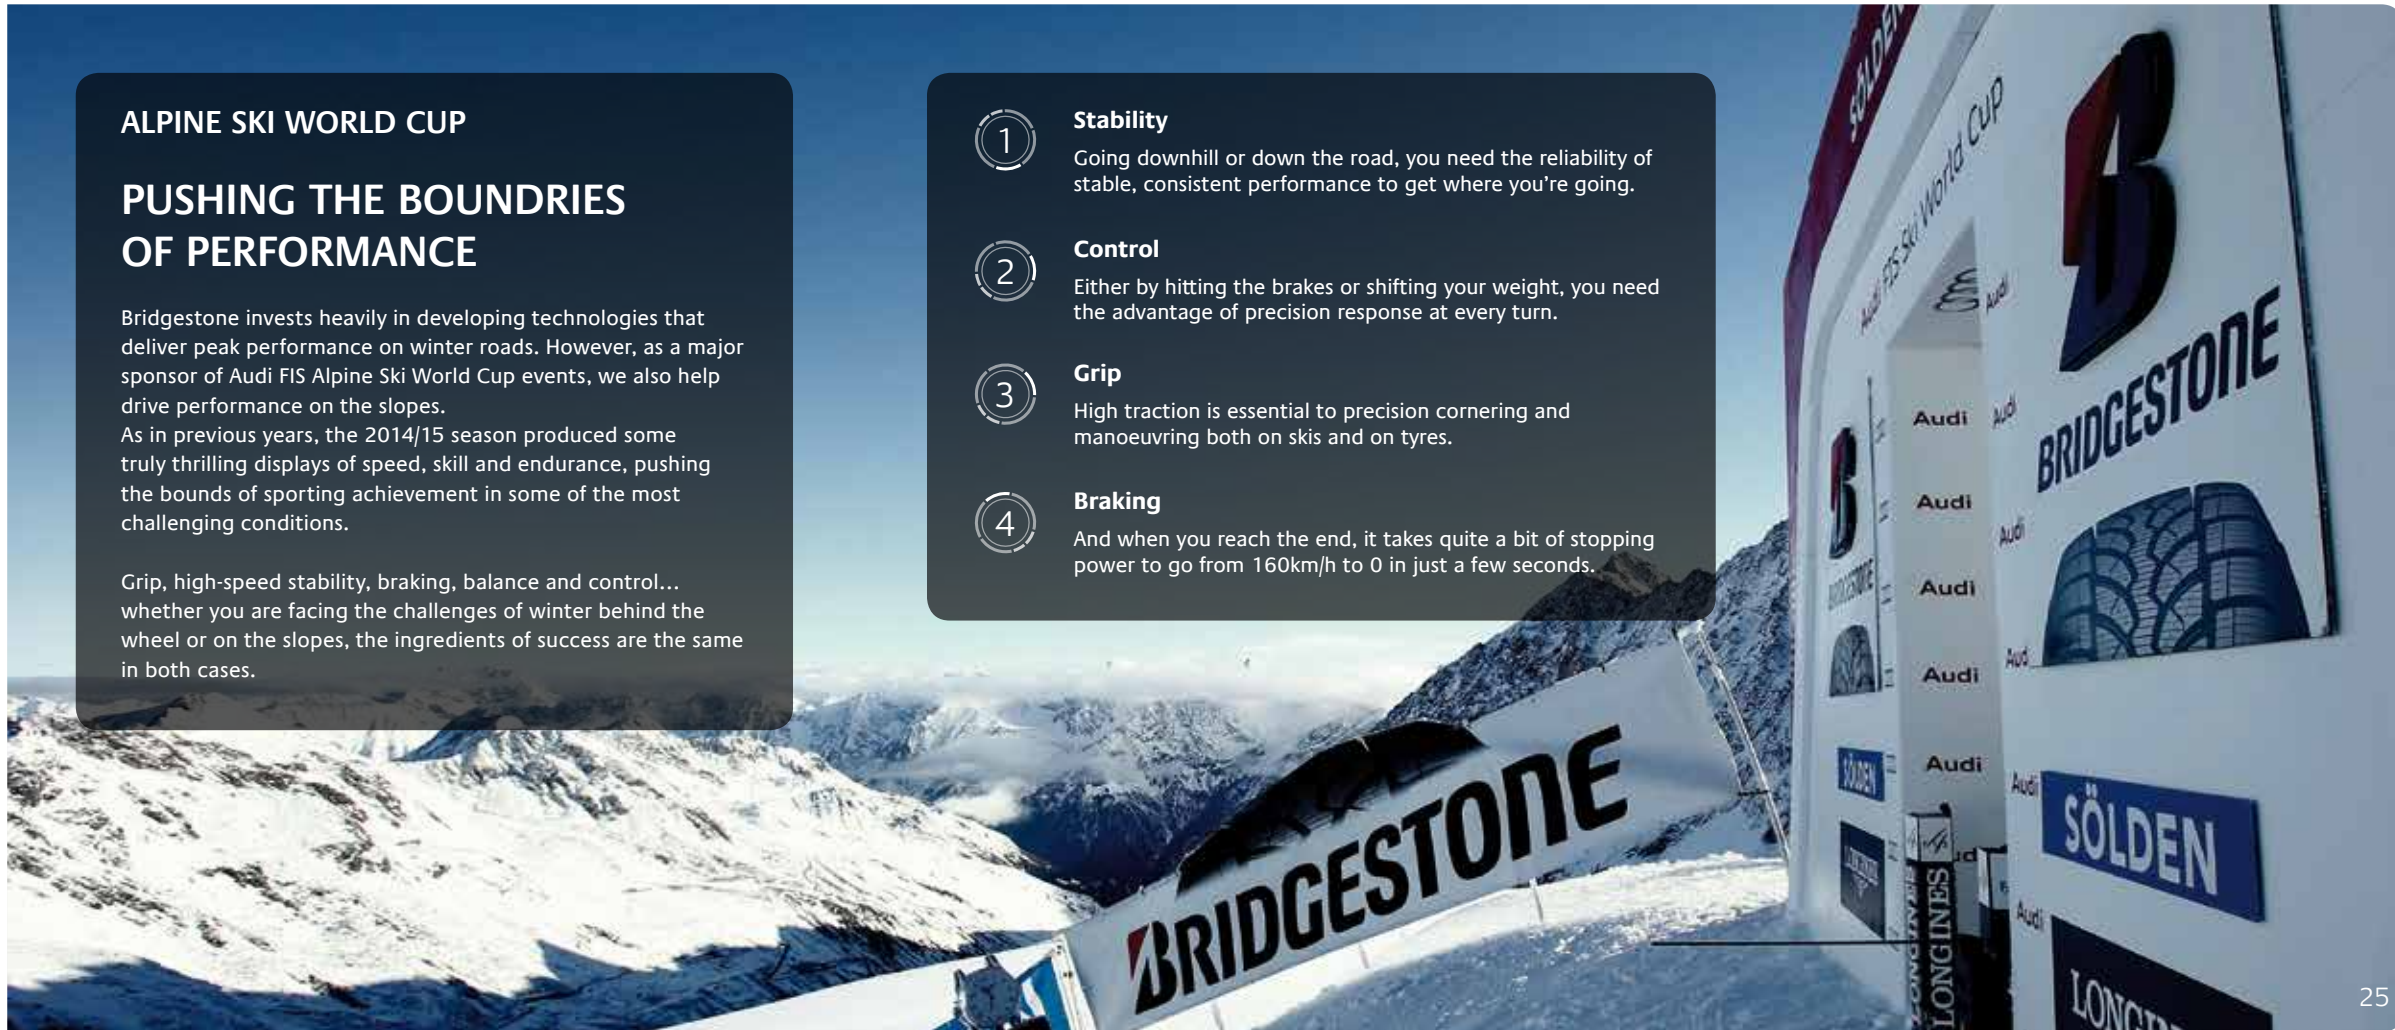

### Grip

High traction is essential to precision cornering and manoeuvring both on skis and on tyres.

4

### Braking

And when you reach the end, it takes quite a bit of stopping power to go from 160km/h to 0 in just a few seconds.

## BRIDGESTONE WINTER PROVING GROUND

# DRIVING INNOVATION IN WINTER TYRE DEVELOPMENT

Located less than 100 km from the Arctic Circle, Bridgestone's Swedish Proving Ground (SPG) boasts some of the most advanced facilities in the world for testing premium winter tyres. Simulating a wide range of both extreme and variable winter conditions, SPG's international team of engineers closely monitor the performance of hundreds of prototypes every season. As such SPG is a crucial element in Bridgestone's R&D programme, driving innovation in the development of premium winter tyres.

## FACTS

- 1 Dedicated testing of passenger vehicle, van, truck and bus tyres
- 2 State-of-the-art resources for both subjective and objective testing
- 3 Intensive testing activity for up to 17 weeks a year
- 4 Multiple tracks designed specifically for testing the ice and snow performance
- 5 Five snow canons and irrigation system to produce artificial snow if required

## BRIDGESTONE RUN-FLAT TECHNOLOGY

### SUPERIOR PROTECTION FOR YOU AND YOUR FAMILY\*

Give yourself the added safety, security and peace of mind of Bridgestone RFT tyres. Bridgestone is a pioneer in the field of Run-Flat technology and a leading manufacturer of RFT tyres today. Bridgestone RFT tyres deliver superior protection\* both during and after a sudden loss of tyre pressure, keeping you in control at the moment of puncture while keeping you mobile afterwards.

With the ability to drive up to 80 km at 80 km/h\*\*, Bridgestone RFT tyres help you avoid being stranded on busy roads (or deserted ones). To keep you and your passengers safe, whatever the time of day and wherever you happen to be.

\* vs. comparable tyres without Run-Flat Technology.

\*\* Bridgestone Run-Flat Technology tyres let you keep on driving for more than 80 km at 80 km/h, in the event of a sudden loss of air pressure, as determined by vehicle test and/or ISO tests. Consult your vehicle owner's manual for actual running distances for your vehicle.

#### Increased Safety during Moment of Puncture

Maintain control of your vehicle, even in the event of a sudden puncture or loss of pressure while driving.

#### Enhanced Protection after Puncture

Avoid being stranded on busy roads or in other potentially dangerous situations.

#### Greater Convenience

Continue driving to your destination\*\* and change or repair your tyre when it suits you.

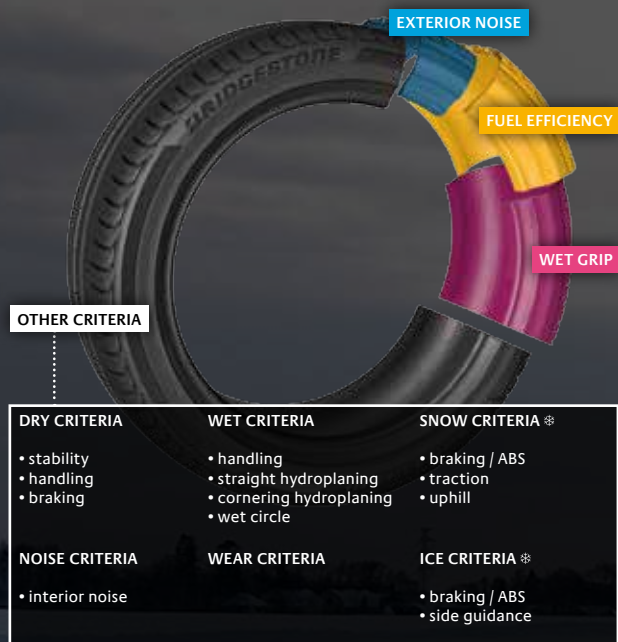

## EUROPEAN TYRE LABEL REGULATION

As of 1 November 2012, all passenger tyres sold in the European Union must be labelled with an official EU tyre label. This label contains information about three important criteria: wet grip, fuel efficiency and exterior noise. However, it is far from the end of the story when it comes to evaluating tyre performance.

Which is why Bridgestone invests in tyres that deliver premium safety and comfort during their entire lifespan, across a wider range of conditions and in several other areas not covered by the new label. Areas such as wet-weather handling, dry braking performance, high-speed stability, resistance to aquaplaning, wear resistance, comfort and interior noise. In the case of winter tyres, Bridgestone also develops advanced compound and tread technologies to ensure superior handling characteristics, braking, acceleration and steering response at low temperatures and on snow and ice. Together, all these criteria tell the real story behind premium tyres, and guide you in buying the right tyre for your driving requirements.

### TYRE PERFORMANCE CRITERIA

\*Proportions based on ADAC summer tyre test criteria | \* = winter only

#### EXTERIOR NOISE

3 ratings from 1 (quietest) to 3 (least quiet)

Exterior tyre noise is measured in decibels (dB) and compared with the new European tyre exterior noise levels to be introduced in 2016.

##### 1 sound wave

= already 3dB below the future European limit

##### 2 sound waves

= already compliant with the future European limit

##### 3 sound waves

= compliant with the current European limit

Note: exterior noise is not related to interior vehicle noise.

#### FUEL EFFICIENCY

6 classes from G (least efficient) to A (most efficient)

Rolling resistance is one factor of your tyres that can affect your fuel consumption. The lower the rolling resistance, the less fuel is required to move your vehicle forward and the less carbon emissions are generated. The difference in fuel consumption between A and G-rated tyres could be as much as 7.5%. For an average passenger vehicle, that is around 0.65L per 100km.

#### Fuel consumption

Over 0.65L/100km more consumption

\*Source: European Commission's impact Assessment SEC (2008) 2860.

Note: good tyre maintenance is just as important when it comes to saving fuel. The exact values depend on your vehicle type, the road conditions and your driving style.

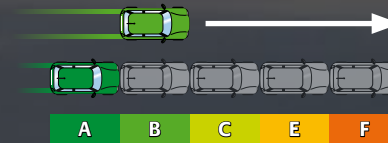

#### WET GRIP

from A (best) to G (worst)

Braking response is one important element of your tyre's performance in the wet and is essential for your safety. The difference in braking distance between A and G-rated tyres could be as much as 30%. For a passenger car travelling at 80kph, for example, that can mean up to 18m in the case of full braking in wet-weather conditions.

#### Braking distance

Up to 18m longer (full braking at 80kph)

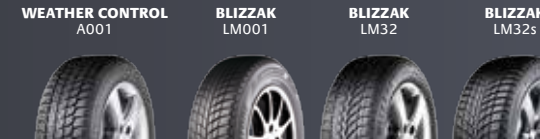

\*Source: European Commission's impact Assessment SEC (2008) 2860.

Note: several other factors affect your safety in wet and dry conditions. Distances may vary depending on your vehicle type and the road conditions.
