

HOW TO MEASURE YOUR SCOPE CAP

MEASURE BY CALIPERS

Use the calipers to measure the outside edge of the scope housing on both the eye piece and objective. You can measure in inches or millimeters.

OR

MEASURE BY RULER

A. Stand your scope up on a piece of paper. Mark a line on each side of both the eyepiece & objective lenses.

B. Use a ruler to measure the distance between the lines of each lens to determine the size of scope cover you need.

THEN

Use your measurements and select the style of cover you want from the Butler Creek®. Find the size that is closest to your measurements to get the best-fitting scope cover.
