

# CALIBER Grips™

## Installation Instructions for Part No. 13200

### HARDWARE INCLUDED:

Qty	Description
6	15" Grips
1	75 pk of Truss Head SS screws

### TOOLS REQUIRED:

- Power Screwdriver (T20 Torx Included)
- Tape Measure
- Pencil or Marker

### READ ALL INSTRUCTIONS CAREFULLY PRIOR TO ASSEMBLY

**Step 1:** Find the center the traction area on the trailer deck. Mark this on the trailer deck at the rear of the trailer.

**Step 2:** Place the first Grip at the very rear of the trailer deck centered on the mark from **Step 1**.

**Step 3:** Layout the remaining 5 Grips on the deck, making sure the Grips are 10 inches apart from center to center.

**CAUTION:** Before installing screws, check for adequate clearance where marker lights and wires have been installed under the trailer deck.

**Step 4:** Use a power screwdriver to fasten the Grip to the deck using 6 screws per Grip. Place the corner screws 1" from the edge of the Grip, and center the 2 middle screws. **NOTE:** The screwdriver should be powerful enough to drive the screws through the Grip and into a wood deck without pre-drilled holes.

**WARNING:** CALIBER Grips are designed to add traction to the trailer deck for the snowmobile track, but are slippery, especially when wet or covered with frost, ice and/or snow. Extreme caution should be taken when walking or climbing on any trailer deck on which Grips are installed. Always load snowmobiles at low speeds using extreme caution.

### DISCLAIMER

Caliber, Inc. shall not be liable for any special, incidental or consequential damages, including, but not limited to, lost revenues, lost profits, personal injury, damage to property, and third-party claims, arising out of any warranty, contract, statutory or tort. Notwithstanding the term of any limited warranty or any warranty implied by law, or in the event that any limited warranty fails of its essential purpose, in no event will Caliber's entire liability exceed the purchase price of this product.
