Retractable Ratchet Tie-Downs

The CargoBuckle Retractable Ratchet tie-down system takes the hassle out of securing gear. Longer, heavier web enables you to tie down more equipment in more applications, conveniently and securely. Just hook, ratchet and go!

All CargoBuckles can be permanently mounted with one bolt on a trailer, toy hauler, cargo rack, lift, truck, ladder rack and in various other applications.

- Permanent one-bolt installation
- Six-foot reach, self-retracting web
- Anti-corrosive construction
- Dual safety lock security
- Seat belt quality, polyester web
- Interactive display package
- Optional adapters available to enable mobility

For added versatility and convenience, the 1" Mini with Dual S-Hooks offers an attached vinyl-coated S-hook with keeper to provide an easy hook-up for any non-permanent mounting.

RodBuckle®

Designed by fishermen for fishermen, the RodBuckle Retractable Rod Hold-Down System is the most attractive and functional rod hold-down on the market for deck style fishing boats. The self-retracting strap extends a full 24 inches and securely locks into position on the deck. The PVC extrusion coated polyester strap grips rods and resists hook penetration. When not in use, it neatly retracts out of the way. Easy installation with mounting template included.

Concealed Mounting Kit
Mounts the retractor inside of the gunwale.

Hook & Loop Tie-Downs

HLS Series

We've added two great new "PLUS" features to this line of hook and loop hold-down products. SUR-Grip release handle allows for a comfortable, secure hold. Rubber grommets provide maximum protection by keeping metal hardware away from valuable equipment.

The Vertical Rod Hold-Down features two foam molded rod inserts that hold up to 8 rods. Innovative design conceals all mounting hardware.

Kwik-Lok Tie-Downs

Kwik-Lok® G2 Transom Tie-Down

Tired of scuffs and scratches on your boat from your standard transom tie-down? The Kwik-Lok G2 protects your boat by keeping all of the buckle hardware away from your boat's transom and placing it at trailer level. The Kwik-Lok G2 is the only transom tie-down on the market with a 360 degree rotating hook, ensuring an easy and secure attachment to virtually any trailer.

A One-of-a-Kind Test Facility

At CAPE®, our commercial vehicle testing capabilities are unsurpassed. Awarded the Crash Test Facility of the Year by *Automotive Testing Technology International Magazine*, CAPE is the premiere test house for the commercial truck, fire apparatus, school bus, military, and motor coach industries.

With CAPE's one-of-a-kind crash test facility, you can count on quality, expertise, responsiveness, and precise results to best evaluate and validate your product's performance. That's what it means to be "CAPE Tested."

Built Big to Test Big

CAPE built the biggest barrier block in the world to put some of the world's biggest vehicles to the test. Our findings have led to significant advancements in safety for the commercial trucking industry and the men and women who drive it forward.

Our modern, state-of-the-art facility is also home to a 90-degree dynamic rollover impact machine which enables us to study occupant protection in a rollover. Our findings led to IMMI's development of RollTek, the first sideroll protection system for commercial vehicles.

At CAPE, we know safety doesn't happen by accident. It happens when it's CAPE Tested.
