Center Line, a new generation

Built by the pioneers of the wheel industry, the Center Line name is defined by its foundation of superior quality, excellence of engineering and innovation. Over 30 years ago Ray Lipper, SEMA hall of fame member and motorsports driver and enthusiast began this legacy that has never lost its focus of building the finest, most technically advanced wheels available.

Continuing on in the brand's commitment to excellence in engineering, a series of one piece cast wheels is now being launched for modern muscle car, truck, and SUV applications. This new generation of wheels brings a fresh perspective in design innovation while encompassing the original classic elements that gave Center Line its name. The heritage advances in this reinvention, now as Center Line Alloy Wheels.
