

All pads feature a positive molding process, which eliminates any impurities in the friction compound ensuring consistent pedal feel and stopping performance. Posi Quiet friction is available in three specialized formulas each suited for a variety of applications.

- Outstanding wear characteristics
- High friction level
- Stable friction performance across wide temperature range

- Longest wearing most advanced material available
- Lowest dust
- Stable friction performance across wide temperature range

- Long wearing
- Low brake rotor wear
- Stable friction performance across wide temperature range particularly high temperatures
- Excellent for fleet service and heavy duty applications

Posi Quiet loaded calipers come with Posi Quiet brake friction installed. All Posi Quiet brake pads are scorched to remove any impurities in the friction material eliminating the need for initial break-in and reducing noise associated with pad glazing. By eliminating the break-in process at the installer level Posi Quiet calipers ensure proper fitment and performance right out of the box. No other aftermarket caliper is as complete or installation ready as Posi Quiet.

BRAKE CALIPERS

Posi Quiet

Original Equipment Replacement Brake Parts

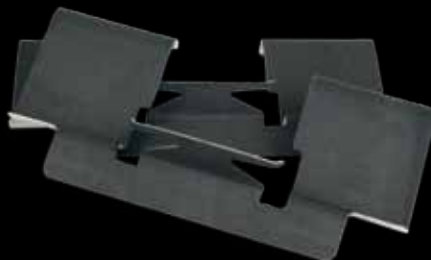

Centric Parts sets the standard in the automotive aftermarket...

Posi Quiet loaded calipers are a full line of brake calipers providing an unmatched level of quality and value. When installing Posi Quiet loaded calipers, technicians can be assured that they are getting top quality products that have been engineered to meet or exceed the function of the original part. Each component is specifically designed for each application and the attention to detail throughout the manufacturing and testing process ensures each caliper will perform to the exacting standards of today's vehicles.

Each Posi Quiet caliper is finished in the same way as the original from the factory; Posi Quiet calipers feature a Zinc Dichromate finish, or O.E. colored powder coating depending on the application. This feature ensures that the caliper will look as good as it works throughout its lifetime.

Less Noise:

Posi Quiet calipers utilize the new Quiet Clips™ style abutment clips. These quiet clips ensure proper pad fitment and reduced vibration related noise under braking.

All New Hardware:

Posi Quiet calipers have all new hardware installed. All guide bolts, pins, through bolts and seals are replaced guaranteeing the caliper will function correctly.

New Pistons:

Every piston phenolic or steel is replaced to guarantee proper performance throughout the lifetime of the caliper.

New Seals and Boots:

Posi Quiet calipers come complete with all new dust seals, O-rings and boots.

No Leaks:

All Posi Quiet calipers are 100% pressure tested after final assembly. In addition, all threads are re-tapped and surfaces re-knurled to provide proper sealing of banjo style fittings and hose ends.

Posi Quiet Friction:

All Posi Quiet calipers are loaded with Posi Quiet friction compounds that have been specifically formulated to match original equipment.

Rust Proof Finish:

All Posi Quiet calipers receive either a Zinc Dichromate plated finish or O.E. color powder coating depending on the application. This finish will not interfere with final fitment and provides long lasting, rust free performance.
