

**GEOMET® Coating**  
Partial coating results in 10% faster pad bed-in  
Eliminates corrosion rings on friction surface  
Full GEOMET® coating on all non-mating surfaces

# GCX

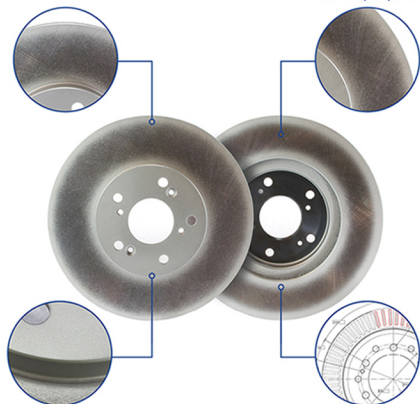

## ELEMENTAL PROTECTION

**Double Disc Ground Finish**  
Installation ready finish  
Eliminates lateral run-out and DTW issues  
Eliminates pedal pulsation

## Innovation Through Superior Design

**GEOMET® Coating**  
Partial coating results in 10% faster pad bed-in  
Eliminates corrosion rings on friction surface  
Full GEOMET® coating on all non-mating surfaces

**Double Disc Ground Finish**  
Installation ready finish  
Eliminates lateral run-out and DTW issues  
Eliminates pedal pulsation

**Machined Non-Friction Surfaces**  
Premium finished appearance matches OE  
Ensures parallelism and eliminates pulsation  
Improves rotor balance

**OE Style Vane Design**  
Increased thermal capacity  
Optimized performance  
Safer/smooth braking

Class leading application coverage for import and domestic passenger vehicles and light trucks

Superior protection from corrosion and rust even in the harshest of environments

Restores original factory appearance and performance

Engineered and manufactured for maximum durability and extended service life

GEOMET® coating on rotor vanes prevents corrosion and promotes efficient rotor cooling
