Installation Instructions

Electric Trailer Brake Control Wiring Adapter

VEHICLE STOP LAMP SWITCH TO BRAKE CONTROLLER (INPUT)

GROUND

A CAUTION

Plug brake control adapter into mating receptacle on backside of brake control before attaching to the vehicle connector (A).

- 1. Locate the vehicle's electric brake control harness. The harness will be located underneath and left of the steering column, taped to another harness near the emergency brake pedal. There will be a 5-pin connector that mates with the one on the adapter **B**. Locate a suitable grounding point near the connector such as an existing ground stud or drill a 3/32" hole and secure the white wire using the eyelet and screw provided. (Do not drill into vehicle floor or bed.) Clean dirt and rustproofing from area.
- Plug the brake control adapter into the vehicle's 2. electric brake control harness connector. Follow all brake control manufacturer's installation instructions.

Complete the installation per the electric brake control manufacturer's instructions and mount the unit as directed. Perform test procedures as instructed.

WARNING

Overloading circuit can cause fires. DO NOT exceed lower of towing manufacturer rating or: Max. 4 axles: 8 brakes (24 amps) Read vehicle's owners manual and instruction sheet for additional information.
