

About This Brush

Easily scrub and clean filthy and stained tire sidewalls with the Curved Tire Brush. Designed with a unique curved block, the contoured Curved Tire Brush hugs any tire sidewall to make full cleanings a breeze! Sturdy and stiff synthetic bristles stand up to heavy duty wheel cleaners, degreasers, and all kinds of road grime. Easily scrub out and clean embedded dirt, grease, road tar, brake dust, motor oil, and anything else kicked up on the tires with the Curved Tire Brush. A full-synthetic design resists all cleaning chemicals and pollutants left on tires while driving on the road. Scratch-resistant plastics and a soft rubber brush handle absorb accident impacts and bumps on wheel and fender parts. The textured rubber grip puts ergonomic comfort and maximum leverage in the hand of any professional detailer or hardcore enthusiast whenever cleaning tires. Hang up the Curved Tire Brush from the convenient hanging hole for easy storage between uses. Choose the right tool for the job: add the Curved Tire Brush to your wheel detailing bucket, and make even old tires shine like new.

Smart Cleaning Shape

The unique contour of the Curved Tire Brush easily covers any tire from rim to tread. Quickly scrub any tire sidewall, from low profile drift car and stanced rides to classic 1950s cruisers with plush whitewalls. A comfortable handle gives maximum leverage and powerful scrubbing force when pushed against the side of the tire. Simply rinse off the wheel and tire, spray any Chemical Guys wheel cleaner, all-purpose cleaner, or degreaser directly into the Curved Tire Brush, then scrub the tire sidewall to release any embedded dirt, grease, grime, and debris from deep within the rubber. Choose the right tool for the job, and pick up the Curved Tire Brush for your next wheel cleaning detail!

Durable Materials Stand Up To Years Of Detailing Use

The Curved Tire Brush is made with shatter-resistant and chemical-resistant plastic and rubber components. The durable materials stand up to intense rubbing, scrubbing, and any type of detailing cleaner, degreaser, and wheel acid used for cleaning wheels and tires. Leave the Curved Tire Brush submerged in the wheel detailing bucket for months on end without any fear of bristles coming undone or brush parts delaminating and crumbling. The comfort rubber grip uses a sealed rubber compound that resists chemical infiltration, ensuring a secure hold whenever you pick up the Curved Tire Brush. The full-synthetic bristles are bunched into thick tufts and securely anchored into the curved block. The glue-free bond leaves no weak materials that can break down in caustic cleaners and lead to premature brush failure over time. Pick one up, and see how no detail was overlooked in the design of the Curved Tire Brush yourself.
